QUINQUENNIAL REPORT ON PUBLIC INSTRUCTION IN BOMBAY FOR 1937-1942

CHAPTER I.

General Progress.

Introduction.

1(1). This Quinquennial Report covers a period of the War and has been written under the shadow of the War. Owing to demands of economy the report has been drastically curtailed and an effort has been made merely to report progress, adding brief remarks regarding matters which demand special notice without giving details.

In spite of the severe strain on the resources of the Province owing to the War and its repercussions here, a cursory glance at the figures shew that during the period under review steady progress was maintained. It is a matter of genuine satisfaction that during the period, despite various difficulties, it has been possible to spend over a crore of rupees more on education than five years ago, and there has been an increase of over half a million in the number of scholars and an increase of over 8,000 in the number of educational institutions. This general increase is shared by all classes of institutions and the Primary stages share with the higher branches of education the progress that has taken place during recent years. Over 8 per cent. of the population is now receiving instruction in some form or other.

Main features.

1(2). The main features as revealed by statistics may be summed up as follows :—

The total number of educational institutions increased by 8,142 to 22,751, of which 22,388 were recognised, as against 13,939 five years ago. The recognised institutions comprised 21 Arts and Science colleges, 16 Professional colleges, 869 Secondary schools, 19,981 Primary schools and 1,501 Special schools. Although the increase was shared by all types of institutions, the bulk of the increase was in Primary and Special schools. This was due to the opening of a number of voluntary Primary schools and literacy classes for adults.

Of the 21,567 towns and inhabited villages, 13,976 possessed schools, as against 8,975 in 1937. On 31st March, 1942, there were only some 39 large villages without schools, as against 234 five years ago.

The total number of pupils in all kinds of educational institutions rose by 519,392, or 38·9 per cent., to 1,855,281, of whom 1,364,944 were

boys and 490,337 girls. The following table compares the number of educational institutions and the pupils in them in 1936-37 and 1941-42 :—

	Schools			Pupils		
	1936-37	1941-42	Increase during the quinquennium	1936 37	1941-42	Increase during the quinquennium
1	2	3	4	5	6	7
Arts Colleges ..	15	21	+6	10,010	15,031	+5,021
Professional Colleges.	12	16	+4	3,347	4,940	+1,593
Secondary Schools	639	869	+230	127,087	192,701	+65,614
Primary Schools.	12,901	19,981	+7,080	1,140,299	1,564,620	+424,321
Special Schools ..	372	1,501	+1,129	18,826	55,397	+36,571
Total, Recognised.	13,939	22,388	+8,449	1,299,569	1,832,689	+533,120
Unrecognised ..	670	363	—307	36,320	22,592	—13,728
Grand Total ..	14,609	22,751	+8,142	1,335,889	1,855,281	+519,392

The percentage of male scholars to the total male population increased from 10·86 to 12·62 and that of female scholars from 3·79 to 4·89. Appendix I published with this Report gives further details of pupils of different communities attending various kinds of educational institutions and of the population of the principal communities.

The total expenditure on Public Instruction increased by about Rs. 111 lakhs to about Rs. 487 lakhs and was met from the following sources :—

	1936-37		1941-42	
	Amount	Percentage	Amount	Percentage
	Rs.		Rs.	
Government Funds ..	1,55,51,740	41·4	2,06,13,082	42·3
Board funds	70,28,396	18·7	78,19,085	16·1
Fees	95,93,470	25·5	1,45,64,929	29·9
Other sources	54,28,233	14·4	57,07,702	11·7
Total ..	3,76,01,839	100·0	4,87,04,798	100·0

University.

1(3). During the last five years 13 new colleges were affiliated to the University and the number of students increased by 9,300, bringing the total up to 27,000. Of the 20,000 students attending University institutions in this Province, only 5,000 were in Professional colleges, of whom over 1,000 were in Law colleges. Although there has been a marked increase in the number of students taking up professional courses, the number of students studying Medicine, Engineering and Technology is still comparatively small. The most encouraging feature, however, is that more attention is being paid to research and there is increasing recognition for the necessity for research.

This rapid expansion has placed a heavy burden in men and material on the slender resources of the colleges and has raised problems which will require careful consideration. A number of institutions have sprung up without making very satisfactory provision for the staff and their conditions of service, and are developing as isolated units instead of being included in an organised system. There is a multiplicity of colleges doing identically the same work in the same area, and over-emphasising the teaching of certain courses to the neglect of others. The recent opening of Professional colleges of Commerce and Teaching is a healthy sign but there is considerable scope for differentiation and co-ordination of effort, particularly in regard to post-graduate work.

Secondary Education.

1(4). Secondary education has also shewn steady progress in the number of institutions and pupils. Here also the rapid growth has thrown a heavy strain on the slender resources of the schools. Although the numbers have gone up, there has not been any marked change in the general tone and condition of schools. Most of the schools are overcrowded and not well equipped and the general conditions of service of the Secondary school teachers are far from satisfactory.

During the period under review a Provident Fund scheme for teachers was introduced and made compulsory as a condition of recognition, and the requirements of the grant-in-aid code tightened up regarding the mode of recruitment, security of tenure and conditions of service of Secondary school teachers. The main difficulty is in regard to the salary paid and accepted by the teachers. Unless a definite effort is made to charge reasonable fees, and the father is prepared to pay adequately for the education of his child, it will be difficult to bring about any marked improvement in the general tone of Secondary schools.

Another important change was the introduction of vocational courses for Secondary schools and the decision of Government to hold a separate School-leaving Certificate Examination. So far all Secondary schools were preparing candidates for the University Matriculation and there was a multiplicity of Secondary schools doing almost identical work. The Matriculation examination with its rigid requirements was found to be an unsatisfactory school-leaving examination. After about 12 years of schooling if a pupil was unable to satisfy the University in one

or two of the subjects considered necessary for University requirmeents, he had to leave school stigmatised as a failure. He could get no other certificate to shew his utilizable skill. As the general position was not very satisfactory Government decided to hold a special School-leaving Certificate Examination giving school pupils as wide a choice of subjects as possible including Commercial, Agricultural and Technical subjects. At the same time Government converted seven of the Government High schools into Vocational High schools.

Primary Education.

1(5). One of the most difficult problems before the Department is the problem of Primary education. Though there has been marked and rapid progress in recent years, Primary education still lags far behind the actual requirements of the Province. Of the total population of 20 million, only 1·5 million are in Primary schools i.e. roughly for every child in school one is still out of school. These figures are bad enough, but when it is realised that only a small fraction of those that are enrolled complete the elementary course, it must be evident that the progress in general literacy is bound to be painfully slow. The main difficulties, however, are social and economic, and not purely educational. Owing to chronic poverty, lack of communications and ordinary amenities of life, the general conditions in our villages are not such as to stimulate intellectual life. Again iron tradition and age-old customs are still a considerable handicap. The greatest weakness of the educational system is the small number of girls in our schools and the lack of women teachers. Women teachers who are the backbone of elementary education in other countries are scarcely available for this work. Although there has been an increase of over 50 per cent. in the number of girls under instruction, the number of girls attending schools is still comparatively small and our main efforts will have to be directed towards the education of girls. We have come to a stage when boys can to a certain extent look after themselves.

The total expenditure on Primary education increased by about Rs. 42 lakhs to over Rs. 219 lakhs, of which about Rs. 129 lakhs was paid from Government funds. The number of pupils increased by about 4,25,000. The phenomenal increase in the number of pupils and Primary schools is due mainly to the opening of small village schools in the last few years. Government are spending, apart from the grants to Local Authorities for Primary education, over 9 lakhs of rupees in giving direct aid to what are known as voluntary schools i.e. schools opened by voluntary agencies in villages with a population of less than 700. Some 5,600 such schools have been opened and placed in charge of teachers, most of whom are untrained, on a salary of Rs. 10 to 12. These schools, if they are to prove a success, will have to be carefully nursed. For the present they are teaching only the lower standards, but as the numbers grow and higher standards are opened a better type of teacher on an adequate salary will be necessary and this will raise financial problems which will have to be boldly faced.

Of special interest in the development of Primary education is the amendment of the Primary Education Act. This Act was deliberately

amended by Government in 1938 to take over the inspecting staff from the Local Authorities and to vest the Administrative Officer with clearly defined powers in regard to the appointment and transfer of teachers. This step was found necessary in order to create an atmosphere of confidence and stability in the teachers and to make them free from the unwhole-some effects of frequent changes in local politics.

Government also appointed a special *ad hoc* Committee to report on the conditions of service and the scales of pay of Primary teachers. As a result of the recommendations made, the different scales of pay sanctioned for various types of teachers were discontinued and a basic scale of Rs. 25—1/2—30—1—40 sanctioned for trained teachers appointed or trained after 1935. This scale compares very favourably with the scales of pay of Primary teachers in other Provinces and the report made it clear that the suggested Sathe-Paranjpe scale was beyond the present financial resources of the Province.

It was remarked fairly frequently in previous reports that the main weakness of the Primary education system was the insufficient adaptation of the Primary courses to rural requirements. The general curriculum was therefore revised and made more elastic and more practical, giving the teacher as wide a choice of topics as possible to enable him to correlate his teaching with activities associated with the countryside and to create an interest in rural life through an intelligent study of the environment. A special simplified course was also drawn up for small one-teacher village schools and it is hoped that the attempt made to lay stress on practical work and physical training will bear fruit in course of time.

Although the majority of schools are following the ordinary Primary course, there have been some 80 schools following a modified agricultural —bias course for some years. In these schools in the higher standards actual farming is taken up and the main idea underlying the course is to give the village child ideas of better farming, better sanitation and better and brighter living. A distinct type of school for the rural needs of this Province has been tried and promises to develop on right lines if carefully nursed. These schools, however, are more expensive than the ordinary village schools and it was not possible for Local Authorities to have more of such institutions but it is hoped in the near future funds will be made available to convert more schools into agricultural—bias schools.

During the quinquennium a new type of school called the Basic school was also tried with spinning as the basic craft. Some 60 schools were converted into Basic schools and special training centres opened for the training of teachers. The main difficulty experienced in connection with these schools was that spinning by itself was not found a satisfactory and satisfying craft in all schools, particularly in areas where no cotton was grown. The absence of suitable text-books for pupils and literature for the guidance of teachers also proved a definite handicap. The

whole scheme of Basic education is under review and a special committee has been appointed to advise Government on its future development.

Adult Education.

1(6). Another feature which requires special mention is the opening of Adult Education Classes all over the Province. So far Adult Education Classes were meant only for lads engaged in some trade or profession who could not find time to attend ordinary institutions. From 1938 onwards special funds were sanctioned for the opening of special Adult Literacy Classes in urban and rural areas. For the requirements of rural areas lectures and talks on matters connected with health and welfare were also organised and a general scheme of village libraries sanctioned. All these efforts are yielding small but favourable results.

Physical Education.

1(7). In the sphere of Physical education the most important development was the establishment of a separate Institute of Physical Education for the training of teachers. Physical education is now an integral part of the general educational system and medical examination is gradually being introduced in schools. Nearly 70 per cent. of our Secondary schools have introduced medical inspection. It has not been found possible to introduce medical inspection on a large scale in schools in rural areas mainly for lack of medical facilities.

War Work.

1(8). A reference is essential to the War effort made by educational institutions. The schools have proved very naturally an effective means of giving war information through talks, bulletins and performances. General news has been disseminated by the circulation of *Bombay Information* in village schools and the village teacher has been to a large extent responsible for giving information about the progress of the war to the village folk. A number of Secondary schools organised special performances for the collection of funds for various organisations, particularly the Red Cross, and I have nothing but praise for the manner in which both pupils and teachers have helped work-parties in certain areas.

General Remarks.

1(9). Recently there has been a strong tendency to regard education as a luxury which, some believe, in times of political stress can safely be sacrificed. In the years to come India will have to rely to a greater extent than in the past upon rational thinking and the discipline for sustained co-operation of all sections of her people. It is these qualities which are cultivated by a vigorous educational system and these qualities are impaired when that system is crippled. They are worth some sacrifice to preserve and develop. We must have the courage to take a long view of our destinies and it is hoped in the larger interests of the country nothing will be done to retard the progress made so far by boycotting educational institutions and creating a spirit of indiscipline.

In conclusion I wish to record the Department's warm appreciation of the continued good work of the officers in all Branches of the Department who carried out during the last quinquennium many extra duties imposed on them with resource and unfailing cheerfulness.

CHAPTER II.

ADMINISTRATION.

2(1). The process of the gradual replacement of the Indian Educational Service by the Bombay Educational Service Class I is now reaching the closing stages. The total strength of the Indian Educational Service was 16 on 31st March, 1942, against 62 in 1922.

The strength of the various Educational Services on 31st March, 1942, was as under :—

		Total.
All Indian (Indian Educational Service) Service—		
Administration (Direction, Inspection etc.) ..	4	
Collegiate branch	12	16
Bombay Educational Service (Class I)—		
Administration (Direction, Inspection etc.) ..	13	
Collegiate Branch	24	37
Bombay Educational Service (Class II)—		
Teaching, Inspecting and general	106	
Collegiate Branch	65	171
Subordinate Educational Service—		
Inspecting	258	
Teaching	656	
Clerical	350	
Others	106	1,370
Miscellaneous and special appointments outside the regular services—		
Gazetted appointments	23	
Non-gazetted appointments	82	105
Grand Total ..		1,699

During the period under review, 9 officers retired from the Indian Educational Service and 9 Indian Educational Service posts were abolished. Of the 16 Indian Educational Service posts on 31st March, 1942, 4 were held substantively by Europeans, 10 by Indians and 2 were vacant.

The Director is assisted by a Deputy Director in the Indian Educational Service, an Assistant Director in the Bombay Educational Service Class I, three Superintendents in the Bombay Educational Service, Class II and two Junior Superintendents and a clerical staff of 54.

There are four Divisional Inspectors and two Inspectresses responsible to the Director for the general control of Secondary and Primary education in their Divisions. They directly control the Training institutions for Primary teachers and Government Primary schools

There are also four Assistant Educational Inspectors and two Assistant Inspectresses of Girls' Schools in the Bombay Educational Service, Class II. The Educational Inspector is represented in each District by a Deputy Educational Inspector in the Bombay Educational Service, Class II. As a result of the amendment in 1938 of the Bombay Primary Education Act, 1923, the inspection of Primary schools was resumed by the Department in 1938. Before 1938 the Department maintained only a skeleton inspecting staff consisting generally of one Inspecting Officer per District. The posts of Deputy Educational Inspectors in the Bombay Educational Service, Class II, which were abolished in 1925, as a result of the transfer of control to Local Authorities, were revived in 1938, and the inspecting staff was strengthened, so that now there are one District Deputy Educational Inspector, and on an average about 10–12 Assistant Deputy Educational Inspectors in each District. There is also one Administrative Officer in the Bombay Educational Service, Class II for each District School Board. He is appointed by Government but works under the School Board, and is responsible for the general administration of Primary education in the District.

The Provincial expenditure on Direction and Inspection together amounted to Rs. 12,99,099, or 6·3 per cent., of the total Provincial expenditure on Public Instruction in 1941–42, against Rs. 8,95,155, or 5·8 per cent., in 1936–37.

The question of the recruitment of the educationally Backward classes to the educational services received, as usual, the special attention of the Department.

CHAPTER III.

UNIVERSITY.

Introduction.

3(1). The constitution, administration and functions of the Bombay University have been described in my previous Quinquennial Report. An account of the Arts and Professional colleges affiliated to the University is given in Chapters IV and V of this Report.

Institutions and Students.

3(2). On 31st March, 1942, the total number of Arts and Professional colleges affiliated to the University, including the School of Economics and Sociology and the Department of Chemical Technology maintained by the University, was 51 as against 38 in 1937. The total number of students attending the colleges was 27,000, showing an increase of 9,300 students during the quinquennium. Of the 51 colleges, 37 with 20,000 students were in the British Districts of this Province, 8 with 4,300 students in Indian States and 6 with 2,700 students were in Sind. Of the 13 new colleges affiliated, 7 were Arts colleges and 6 Professional colleges. With the affiliation of the Sophia Arts College, Bombay, the Province now has a college meant solely for women.

The following table compares the number and enrolment of the colleges in the British Districts of this Province in 1937 and 1942 :—

	On 31st March 1937.				On 31st March 1942.			
		Number of students.				Number of students.		
	Number of colleges.	Men.	Women.	Total.	Number of colleges.	Men.	Women.	Total.
Arts and Science Colleges ..	15	8,951	1,059	10,010	21	12,304	2,727	15,031
Professional Colleges	12	3,161	186	3,347	16	4,642	298	4,940
Total ..	27	12,112	1,245	13,357	37	16,946	3,025	19,971

While the number of colleges increased by 37 per cent. to 37 during the quinquennium, the number of students increased by over 50 per cent. to 20,000. This rapid expansion has imposed a severe strain on the slender resources of the colleges in men and material and has raised problems which will require careful consideration.

Receipts and Expenditure.

3(3). The total receipts of the University amounted to Rs. 19,33,000, during 1941-42 while the expenditure was Rs. 17,66,000. The following table gives the figures for the quinquennium :—

	Receipts.		Expenditure.	
	1936-37	1941-42	1936-37	1941-42
	Rs.	Rs.	Rs.	Rs.
Government funds ..	1,17,000	1,50,436	1,17,000	1,50,436
Fees, subscription, etc. ..	13,18,348	16,04,102	11,61,156	15,18,448
Endowments	1,00,801	1,78,540	....	97,162
Total ..	15,36,149	19,33,078	12,78,156	17,66,046

Examinations.

3(4). The following table shows the number of students who graduated from the affiliated colleges and of those who obtained the Master's degree during the current and the previous quinquennium :—

	1932-37	1937-42	Percentage increase.
Graduates—			
Arts	6,655	7,694	15·6
Science	1,916	2,684	40·1
Professional Degrees	4,758	7,322	53·9
Masters—			
Arts	675	942	89·6
Science	212	234	10·4
Professional Degrees	54	100	85·2

The results of the various degree and other examinations held by the University are given in Government of India table VIII published with this Report.

The School of Economics and Sociology.

3(5). The School of Economics and Sociology maintained by the University showed steady progress. It had an enrolment of 148 students at the end of 1942 as against 146 in 1937. The school is specially devoted to research work and of the 148 students, 45 were engaged in research. During the quinquennium 13 theses were submitted for the M.A. degree and 12 for the Ph.D., all of which were accepted. The school has an excellent library comprising over 26,000 volumes which caters for the needs of research scholars and others interested in Economics and Sociology.

Department of Chemical Technology.

3(6). There were 43 students in the Department of Chemical Technology at the end of the year, of whom 22 took Textile Chemistry and 21 Chemical Engineering. In addition, 20 students were engaged in research work. During the last five years 84 students took the B.Sc. degree in Technology.

The Department of Technology was fortunate during the quinquennium in receiving munificent donations. A donation of Rs. 12 lakhs was received from the P. G. Singhanee Trust, and a further donation of Rs. 2 lakhs from the Sir Dorab Tata Trust for a Readership in Pharmaceuticals and Fine Chemicals, and a donation of Rs. 40,000 from Miss Baimai L. Palamkote for a Pharmaceutical laboratory. These generous donations have rendered it possible for the University to undertake extension schemes in various branches of Chemical Technology. The foundation stone of the new building at Matunga was laid by His Excellency Sir Roger Lumley in March, 1941.

Foreign Universities Information Bureau.

3(7). The Bureau has proved its value not only as a source of up to date information about Indian and Foreign Universities, but as a channel through which inquiries and applications from students in the Province for admission to educational institutions in Foreign countries are forwarded to the proper authorities.

During the quinquennium the Bureau received altogether 316 applications for admission to educational institutions in the United Kingdom and other Foreign countries and over 9,600 students made written or personal enquiries on matters connected with Indian and Foreign Universities.

General.

3(8). The following is a brief summary of the important events connected with the University during the quinquennium :—

(*a*) The degree of M.Sc. (Agri.) and the Diploma in Teaching were instituted and the Diploma in Public Health was substituted for the degree of Bachelor of Hygiene.

(*b*) The Senate decided to institute a Department of Military studies and passed a Statute for the grant of a Diploma in Military studies.

(*c*) A Conference of the representatives of the University and of Government was held in June, 1939, to discuss questions involving the amendment of the Bombay University Act, 1928. It was decided to postpone the amendment of the Act till the general question of expansion and reform was fully examined by a University Committee.

(*d*) A mixed Committee of representatives of the University, Secondary Education Board and Departmental officials was appointed by Government in 1940 to draw up a scheme for a separate School Leaving Certificate examination so as to give a wide choice of optional subjects to pupils completing the Secondary school course. On the recommendation of the Committee Government decided to institute a Board to conduct a separate School Leaving Examination.

(e) A Committee of persons with experience and expert knowledge of University matters was appointed by Government in February 1942, to report on the question of establishment of a University for Maharashtra.

(f) Permission has been granted by the University to students prevented from continuing their studies in British Universities on account of the War to join courses of this University. Such students have been given certain special concessions and credit for the terms already kept by them in other Universities.

(g) Students of the Bombay University enrolled in the Combatant services have also been given certain concessions such as grant of terms, exemption from appearing in certain subjects, permission to study for the higher examination.

CHAPTER IV.

Arts and Science Colleges.

Institutions and students.

4(1). The number of Arts and Science colleges in this Province affiliated to the Bombay University (including the University School of Economics and Sociology, Bombay, and the Deccan College Post-graduate and Research Institute, Poona), increased during the quinquennium by 6 to 21 and the number of students by 5021 to 15031. Of the 21 colleges, 5 are maintained by Government, one by the Bombay University, 3 by Christian Missions and 12 by other educational bodies.

The total number of women students was 2727 as against 1059 five years ago. This increase is noteworthy.

Appendix I published with this Report gives the distribution of men and women students belonging to the various communities.

Expenditure and grants.

4(2). The inauguration of the bifurcation scheme in the First Year classes which was introduced from June, 1937, necessitated the appointment of additional staff and the provision of the necessary accommodation and equipment. The total expenditure on Arts and Science colleges thus rose by Rs. 8,36,788 to Rs. 31,19,698 which was met from the following sources :

	1936–37		1941–42	
	Amount.	Percentage.	Amount.	Percentage.
	Rs.		Rs.	
Government funds ..	4,90,576	21·5	5,87,628	18·8
Board funds	250	0·0	1,050	0·0
Fees	14,68,754	64·3	21,95,715	70·4
Other sources	3,23,340	14·2	3,35,305	10·8
Total ..	22,82,920	100·0	31,19,698	100·0

The grants-in-aid payable to Arts and Science colleges for the triennium 1939–42 were reassessed during the quinquennium. The grants paid in 1941–42 amounted to Rs. 1,57,000.

The cost per student attending the various Government and non-Government colleges is given in subsidiary table No. 1 published in the Supplement to this Report.

Research Institutes.

4(3). The Deccan College, Poona, was revived as a Post-graduate and Research institute in 1938–39, and the management and administration of the Institute entrusted to a Council of Management. An amount of Rs. 50,000 was spent by Government for providing the necessary equipment, and the Government grant covers the actual budgetted expenditure of the Institute. A grant of Rs. 73,300 was made to the Institute for 1941–42. On 31st March,

1942, 29 students including 2 women were engaged in research in the various Departments of the Institute.

Another Research Institute known as the Kannad Research Institute was established at Dharwar in 1939-40 for research in the cultural history of the Karnatak. During the latter half of the quinquennium the Director of the Institute with the assistance of the two Research Fellows and with the co-operation of the Archaeological Department examined a number of old documents and inscriptions and collected various useful manuscripts and other material. The Museum and the Manuscript Library of the Institute now provides valuable material for further research. The total expenditure of the Institute in 1941-42 amounted to Rs. 11,490 and was wholely borne by Government.

In addition to the expenditure incurred on the two Research Societies mentioned above, an annual grant of Rs. 12,000 is paid to the Gujarat Vernacular Society, Ahmedabad, for research work in Gujarati literature. A token grant of Rs. 500 is also paid to each of the following six other Societies interested in research work in their own fields :—

1. Bharat Itihas Samshodhak Mandal, Poona.
2. Gokhale Institute of Politics and Economics, Poona.
3. Karnatak Historical Research Society, Dharwar.
4. Gujarat Research Society, Bombay.
5. Rajwade Samshodhak Mandal, Dhulia.
6. Islamic Research Association, Bombay.

Royal Institute of Science, Bombay.

4(4). With the introduction of the scheme of bifurcation of studies in Arts and Science from June, 1937, Science teaching up to the Intermediate stage was transferred from the Institute to the Elphinstone College. This transfer has enabled the Institute to concentrate on post-graduate and research work.

There were 192 students in the Institute on 31st March, 1942, of whom 120 were reading in the Junior and Senior B.Sc. classes and 72 were post-graduate students. Research work was carried on both by members of the staff and the post-graduate students. During the year 1941-42, 29 papers were published. Of these, 7 were in Physics, 16 in Chemistry, 4 in Botany and 2 in Zoology.

Examination Results.

4(5). The following table compares the number of students who passed the degree examinations in Arts and Science held in 1936-37 and 1941-42 from the affiliated colleges :—

	1936-37			1941-42		
	Number appeared.	Number passed.	Percentage.	Number appeared.	Number passed.	Percentage.
B.A. ..	2,264	1,663	73·5	2,803	1,999	71·3
M.A. ..	236	156	66·1	336	210	62·5
B.Sc. ..	533	392	73·5	863	600	69·5
M.Sc. ..	52	37	71·2	64	48	75·0

CHAPTER V.

Professional Colleges.

5(1). This Chapter deals with the Professional colleges in this Province affiliated to the Bombay University. An account of Professional schools such as Technical and Industrial schools, Commercial schools and classes, etc. is given in Chapter IX.

There were 16 Professional colleges affiliated to the University with 4,940 students, as against 12 with 3,347 students in 1937. The Secondary Training College, Belgaum, the R. A. Podar College of Commerce, Bombay, the H. L. College of Commerce, Ahmedabad, and the R. L. Law College, Belgaum, were affiliated during the quinquennium. A statistical summary of the Professional colleges is given in subsidiary table No. 1 published in the Supplement to this Report.

Engineering.

5(2). The College of Engineering, Poona, is the only institution of its kind in this Province. In recent years the demand for admission has been far in excess of the number that can be admitted and to meet this increasing demand the number of admissions to the F. E. Class was raised from 75 to 100 from June, 1940. The college maintains classes for both the degree and the diploma courses in Civil, Mechanical and Electrical Engineering.

Commerce.

5(3). With the opening of the R. A. Podar College of Commerce, Bombay, in June, 1941, the number of colleges of Commerce increased from 2 to 3 and the number of students from 510 to 1,572.

There has been an increasing demand for admission to the Commerce colleges after the introduction of the bifurcation scheme of studies in Commerce in 1938. Under the scheme students are no longer required to pass the F. Y. Arts examination but are eligible for admission to a college of Commerce after passing the Matriculation or any equivalent examination. Under the Revised Regulations the course for the Inter-Commerce examination extends over a period of two years and the full degree course in Commerce over four years.

The Sydenham College of Commerce and Economics, Bombay, which is a Government institution, had 796 students on its rolls, as against 415 in 1937.

Evening classes are also held at this college for preparing students for (*i*) the Preliminary Examination of the Institute of Actuaries, London, (*ii*) the examination held under the Auditor's Certificate Rules and (*iii*) the College Diplomas in Accountancy and Secretarial practice.

The Hargovandas Lakhmichand College of Commerce, Ahmedabad, maintained by the Ahmedabad Education Society had 585 students, as against 95 in 1937, while the R. A. Podar College of Commerce which was affiliated in June, 1941, had an enrolment of 191 students.

Agriculture.

5(4). The College of Agriculture, Poona, unique in this Province is under the control of the Department of Agriculture.

The college maintains classes for the B.Sc. (Agri.) degree and on 31st March, 1942, it had 229 students on its rolls. In addition to these students, there were 14 post-graduate students, of whom 4 were reading for the Ph.D. and 10 for the degree of M.Sc. (Agri.).

Medicine.

5(5). There are two Medical Colleges in this Province, the Grant Medical College, Bombay, controlled by the Medical Department and the G. S. Medical College, Bombay, maintained by the Bombay Municipality. Both these Colleges prepare for the degree of M.B.B.S. and in addition undertake post-graduate and research work. The number of students was 770 in the Grant Medical College and 508 in the G. S. Medical College.

The Refresher Courses for Registered Medical Practitioners introduced in 1939 under the joint auspices of these colleges and associated hospitals have proved successful and have now become an annual feature.

Law.

5(6). Of the five Law colleges in this Province, the Government Law College, Bombay, is maintained by this Department, while the other four are maintained by various public bodies. The R. L. Law College, Belgaum, was affiliated in 1939–40.

The courses of studies in Law were revised during the quinquennium. The University framed the necessary Regulations for the new course which were put into operation from June, 1938. The new courses of studies in Law have been introduced in all the Law colleges. Under the revised Regulations the First LL.B. examination was held for the first time in 1939 and the Second LL.B. examination in April, 1940.

Secondary Training Colleges.

5(7). There are three Secondary Training colleges in this Province. Those in Bombay and Belgaum, are maintained by Government, while the Tilak College of Education, Poona, which was affiliated in 1942, is maintained by the Shikshan Prasarak Mandali, Poona. In the two Government colleges provision has been made for the training of 200 students and in the Tilak College of Education for 100 students.

CHAPTER VI.

SECONDARY EDUCATION.

Introduction.

6(1). In this Province the term "Secondary" is applied to schools and classes in which English is taught, whereas in other Provinces the figures for Secondary education include pupils in Primary Middle schools. This chapter deals mainly with Secondary schools for boys, an account of Secondary schools for girls being given in Chapter XII and of European schools in Chapter XIII.

Secondary schools, and pupils.

6(2). Combined statistics for all Secondary schools appear in the tables at the end of this Report. The following table gives the main statistics :—

	Number of schools.		Number of pupils.		Percentage increase in the total number of pupils during the Quinquennium.
	1936-37	1941-42	1936-37	1941-42	
Bombay Division ..	182	286	41,275	67,595	63·8
Central Division ..	145	175	26,552	38,375	44·5
Northern Division ..	179	239	28,022	43,322	54·6
Southern Division ..	63	95	10,709	17,720	65·5
Secondary (English) schools.	41	45	15,410	19,576	27·0
Total ..	610	840	121,968	186,588	53·0
European Schools ..	29	29	5,119	6,113	19·4
Grand Total (all schools) ..	639	869	127,087	192,701	51·6

The figures show an all-round increase. The large percentage increase in the Bombay Division is due to the opening of more schools in Bombay City. The increase in the Southern Division is due to normal growth. This Division is now coming up to the level of other Divisions. Although the average number of pupils per school rose from 199 to 222 only, there are a number of schools with over a thousand pupils. The tendency of schools to become unwieldy still persists.

All Secondary schools recognised by the Department are required to observe the rules laid down in the Grant-in-aid Code and they are open to inspection by officers of the Department. The Bombay University, however, also exercises some measure of control over the High schools through the Matriculation examination and this system of dual control had given rise to difficulties in recent years. By common agreement between the Department and the University the statutes relating to the inspection and affiliation of High schools have been revised, and the schools recognised by the Department are now automatically recognised by the University. The statutes also provide for a joint inspection of a school if in any case a difference of opinion exists between the Department and the University.

Secondary schools for Boys.

Schools and pupils.

6(3). The number of Secondary schools for boys, inluding English-teaching schools increased by 154 to 707 and the number of pupils in them by 54,785 to 158,441. The following table shows the distribution of the schools in each Division :—

	Number of schools.	Number of pupils.	Percentage increase in the total number of pupils during the Quinquennium.
Bombay Division	234	56,305	61·8
Central Division	149	32,928	42·8
Northern Division	211	40,018	50·4
Southern Division	87	16,463	62·3
Secondary (English) Schools	26	12,727	40·8
Total for 1941–42 ..	707	158,441	52·9
Total for 1936–37 ..	523	103,656	19·4

Of the 158,441 pupils in Secondary schools, 69,325 were in the High school stage and 89,116 in the Middle school stage. Of the 19,538 candidates from the British Districts of this Province, who appeared for the Matriculation examination of 1942, 10296, or 52·7 per cent., passed.

The following table compares the distribution of Secondary schools by management :—

	Schools		Pupils		Increase or decrease.	
	1936–37	1941–42	1936–37	1941–42	Schools	Pupils
Government ..	22	18	6,286	4,914	— 4	—1,372
District Local Board ..	129	146	3,829	4,747	+17	+918
Municipal ..	46	59	8,303	11,269	+13	+2,966
Aided ..	261	404	73,741	128,481	+143	+54,740
Unaided ..	65	80	11,497	90,30	+15	—2,467
Total ..	523	707	103,656	158,441	+184	+54,785

6(4). The number of Government Secondary schools for boys decreased by 4 to 18. This decrease was due to conversion of the Government High schools at Ratnagiri, Nasik and Surat into Training institutions for Primary teachers and of the Government High school for boys at Dharwar into a Girls' High school. This accounts for the decrease of 1,372 in the number of pupils in Government Secondary schools.

Government Secondary schools.

The question of introducing a vocational bias in Secondary schools was under the consideration of Government and after a careful survey of the position and in consultation with the Board of Secondary Education Government decided to convert seven of the Government High schools into Vocational High schools as under :—

(1) The R. C. High School, Ahmedabad, into a Commercial High School.

(2) The Northcote High School, Sholapur .. } into Technical High
(3) The Elphinstone High School, Bombay .. } Schools.

(4) The Government High School, Satara .. }
(5) The Government High School, Bijapur .. } into Agricultural
(6) The Telang High School, Godhra .. } High Schools.
(7) The G. S. High School, Jalgaon .. }

A vocational bias was introduced in standard IV of these schools from June 1939, and the upper standards have since been brought under the Vocational scheme. The G. S. High School, Jalgaon, was converted into an Agricultural school in 1940 and the Elphinstone High School, Bombay, into a Technical school in the subsequent year.

6(5). Of the 689 non-Government Secondary schools for boys, 301 were High schools and 387 Middle schools, including 190 English classes attached to Primary schools. Most of the English classes are a cheap substitute for well organised Secondary schools. These classes form a weak link in the system of Secondary education, but they have been popular in rural areas on account of the desire of the village folk to learn English.

Non-Government Secondary schools.

To distribute financial aid to recognised Secondary schools equitably, Government introduced a scheme in 1938-39 by which the grants-in-aid of Secondary schools were limited to 20 per cent. of the admitted expenditure for 1937-38 for boys' schools and to 25 per cent. for girls' schools. This scheme has since been brought into full effect and the grants of all schools recognised before 1st June 1938, have been restricted to the limits laid down by Government. Schools recognised after this date are paid token grants from savings. The expenditure of all schools, however, has been increasing, but it has not been possible to revise the position and to extend further financial aid.

The following table compares the distribution of boys in Secondary schools for boys and girls belonging to the principal communities :—

	Number of boys in Secondary schools.				Total male population.	Percentage of boys to population.
	1936–37		1941–42			
	Number.	Percentage to total.	Number.	Percentage to total.		
Indian Christians ..	6,601	6·7	8,666	5·9	180,372	4·8
Hindus { Advanced ..	45,327	45·8	66,390	45·3	895,615	7·4
Hindus { Intermediate.	23,753	24·0	37,167	25·3	6,112,470	0·6
Hindus { Backward ..	2,546	2·6	4,662	3·2	2,358,173	0·2
Muslims	9,391	9·5	14,369	9·8	1,040,318	1·4
Parsis	4,906	4·9	5,534	3·8	43,467	12·7
Others	6,454	6·5	9,765	6·7	186,918	5·2
Total ..	98,978	100·0	146,553	100·0	10,817,333	1·4

There has been a general increase all round but the large percentage increase in the number of pupils of the Intermediate Hindus and the Backward classes is an encouraging feature. The special facilities offered in the form of free-studentships, scholarships, etc. are being well used by these classes.

Expenditure.

6(6). The total expenditure of all Secondary schools for boys (including English-teaching schools) rose by Rs. 23,84,130, or 38·8 per cent., to Rs. 85,25,335. The following table gives the sources from which it was met in 1936–37 and 1941–42 :—

	1936–37		1941–42	
	Amount.	Percentage.	Amount.	Percentage.
	Rs.		Rs.	
Government funds	12,69,670	20·7	13,73,980	16·1
District Local Board funds ..	14,464	0·2	9,811	0·1
Municipal funds	1,73,594	2·8	1,36,128	1·6
Fees	36,77,218	59·9	58,85,470	69·0
Other sources	10,06,259	16·4	11,19,946	13·2
Total ..	61,41,205	100·0	85,25,335	100·0

The following table compares the average cost per pupil during the period under review :—

	Total cost.		Cost to Government.	
	1936-37	1941-42	1936-37	1941-42
	Rs.	Rs.	Rs.	Rs.
Government	126·5	108·7	86·2	74·6
Board	38·5	33·5	5·3	4·7
Aided	53·9	52·9	8·8	7·1
Unaided	67·6	59·9	..	..
Total ..	58·0	53·1	12·0	8·6

There has been a gradual decrease in the average annual cost of educating a pupil in a Secondary school. This is due partly to the increase in the number of pupils attending Secondary schools and partly to the lowering of staff salaries. Efforts are being made to check the progressive reduction in teachers' salaries and to ensure suitable pay scales for teachers. The Grant-in-aid Code requirements in this connection have been tightened up to ensure security of service for teachers in Secondary schools and to bring about an improvement in the general conditions of service. A Provident Fund for the benefit of teachers in non-Government Secondary schools has been introduced in almost all schools.

Special facilities.

6(7). The special facilities provided by Government for pupils of the various communities attending Secondary schools include free-studentships, scholarships, fee-grants, remission of room-rent in hostels attached to Government Secondary schools, etc. Free-studentships in Government Secondary schools are admissible for 5 per cent. of the pupils of the Advanced classes, 22·5 per cent. of the pupils of the Intermediate classes, 75 per cent. of the pupils of the Backward classes (excluding Scheduled classes) and 20 per cent. of the Muslim pupils. Under the scheme of free-studentships, the total financial liability of Government is limited to 15 per cent. of the number of pupils in Government schools in each Division.

Pupils of the Scheduled classes, if eligible, are admitted free in Government Secondary schools. Children of the Konkani Maratha communities, of Indian soldiers and followers, and of school mistresses are admitted free to Secondary schools. Non-Government schools recover in Government grants any fee-losses they sustain by extending these privileges to their pupils. Government's expenditure on this account amounted to Rs. 50,598, during the year 1941-42. There is also provision for several sets of special scholarships tenable in High and Middle schools for pupils belonging to the non-Advanced communities. To enable pupils of the various communities to secure admission into Government Secondary schools, Government has fixed communal percentages.

6(8). The following table compares the number of male teachers in Secondary schools for boys and girls :—

Teachers.

	Total number of teachers.	Trained teachers.		Graduates.	
		Number.	Percentage.	Number.	Percentage.
Government	299	201	67·2	224	74·9
District Local Board and Municipal	669	354	52·9	250	37·4
Aided	6,287	3,235	51·4	3,280	52·2
Unaided	581	173	29·8	227	39·0
Total Non-Government ..	7,537	3,762	49·9	3,757	49·8
Grand Total ..	7,836	3,963	50·6	3,981	50·8
Total for 1936-37 ..	5,601	1,253	22·4	2,659	47·5

It will be seen that the total number of male teachers has increased by 2,235 to 7,836, of whom 3,963, or 50·5 per cent., are trained, as against 1,253, or 22·4 per cent., five years ago. The number of graduate teachers also increased from 2,659 to 3,981 and the percentage of such teachers to the total number of teachers has also risen from 47·5 in 1936–37 to 50·8 in 1941-42.

To meet the increasing demand for the training of Secondary teachers another Secondary Training college was opened by Government in 1939 at Belgaum which provides for the training of 100 teachers a year. In addition to the Training colleges preparing candidates for the B.T. degree, several training classes for teachers, mostly non-graduates, wishing to appear for the Secondary Teachers' Certificate examination have been recognised. The Secondary Teachers' Certificate examination aims at the improvement of the professional qualifications of teachers who do not possess a degree in teaching. The Bombay University has also recently instituted a Diploma in teaching. The results of these examinations appear in Government of India Table VIII published with this Report.

Courses and Examinations.

6(9). Secondary schools follow generally the courses of studies laid down for the various standards in Schedule D of the Grant-in-aid Code. Schools are, however, allowed to make suitable alterations in these courses with the sanction of the Department to meet their special needs. In a few schools instruction in Agricultural, Industrial or Commercial subjects has been introduced. English-teaching schools adopt the courses laid down in Schedule C of the Grant-in-aid Code. The question of evolving courses of studies to meet the common requirements of both Secondary and English-teaching schools is under the consideration of the Board of Secondary Education.

The Matriculation examination has so far been the only School Leaving Examination and the unwholesome influence this examination

is having on Secondary education has been the subject of criticism in recent years. The requirements of the Matriculation are so rigid that, if a lad fails to satisfy the University in a subject or two as required by the University, he is unable to get any certificate after 12 years of schooling to show his utilisable skill. Government, in order to get over this difficulty, have decided to institute a School Leaving examination giving to the candidates as wide a choice of subjects as possibile including Agricultural, Commercial and Technical subjects, and a special Board has been set up for the conduct of the examination.

The School Book Committees.

6(10). There are five School Book Committees for Regional languages and a Provincial Board for Education in Hindustani, an account of which is given in the Chapter on Primary Education. In addition to these, the Provincial School Book Committee, of which the Director of Public Instruction is President, considers books intended for Secondary schools. The following table compares the work of this Committee during 1936–37 and 1941–42 :—

	Year.	Number of books received including the opening balance.	Number of books disposed of		Books sanctioned as			Balance.
			Sanctioned.	Rejected.	Text books.	Pupils' Library books.	Teachers' Library books.	
Provincial School Book Committee ..	1936–37	479	370	12	142	171	57	97
	1941–42	158	84	18	53	24	7	56

School Broadcasts.

6(11). As stated in my previous Report, more schools are using the educational programmes broadcast by the All-India Radio.

All Government Secondary schools and a number of non-Government schools are equipped with Radio-receiving sets and a period or two is set apart to enable pupils to listen to educational broadcasts. Some of the schools which have no sets of their own are reported to be taking advantage of the public Radio sets installed in public halls.

The educational programmes broadcast by the All-India Radio, Bombay, are well planned on the whole and deal with topics calculated to convey to young listeners useful information on a variety of subjects.

Board of Secondary Education.

6(12). To advise Government on matters connected with Secondary education, Government appointed in 1939 a Board of Secondary Education consisting of 14 members representing various interests. Since its constitution the Board considered various questions concerning the reorganization of Secondary education and advised Government on various problems connected with Vocational High schools.

CHAPTER VII

Primary Education

Introduction.

7(1). In this Province Primary schools impart instruction wholly through the mother tongue and teach the whole or a part of the course leading up to the Primary School Certificate examination. The course covers a period of eight years and consists of two stages, viz. the Elementary or the Lower Primary stage (Infants and Standards I to IV) and the Upper Primary stage (Standards V to VII). The Primary school course for girls is now similar to that for boys and the standards of boys and girls schools are now identical.

Schools and pupils.

7(2). These five years have seen a rapid expansion of Primary education. On 31st March, 1942, there were 19,981 Primary schools for boys and girls attended by 1,564,620 pupils, as against 12,901 schools with 1,140,299 pupils five years ago. The following table compares the figures for 1936–37 and 1941–42 by management :—

		Number of schools			Number of pupils		
		1936–37	1941–42	Increase	1936–37	1941–42	Increase
Government	Boys	22	26	4	3,289	3,954	665
	Girls	9	10	1	1,222	1,371	149
District Board.	Local Boys	8,463	9,171	708	617,971	723,832	105,861
	Local Girls	740	776	36	53,730	71,888	18,158
Municipal	Boys	1,063	1,205	142	233,406	270,945	37,539
	Girls	518	589	71	98,842	126,080	27,238
Aided	Boys	1,612	7,747	6,135	98,059	329,866	231,807
	Girls	196	302	106	21,119	28,551	7,432
Unaided	Boys	263	141	—122	11,357	6,883	—4,474
	Girls	15	14	—1	1,304	1,250	— 54
Total	Boys	11,423	18,290	6,867	964,082	1,335,480	371,398
	Girls	1,478	1,691	213	176,217	229,140	52,923
	Total	12,901	19,981	7,080	1,140,299	1,564,620	424,321

Although all managements contributed to the total increase of 7,080 schools and of 424,321 pupils, the bulk of the increase was in aided schools. The increase of 6,241 aided schools was due almost

exclusively to the opening of one—teacher voluntary schools under the scheme of mass literacy.

In 1938–39 Government launched a scheme to abolish mass illiteracy at an extra initial cost of about Rs. 4½ lakhs. Public response to the scheme was spontaneous and 2,400 voluntary schools were opened during the year. Private enterprise further added over 3,200 Primary schools, so that within a period of less than four years there was a network of small village schools all over the Province. On 31st March, 1942, there were 8,049 aided Primary schools attended by 358,417 children, as against 1,808 schools with 119,178 children five years ago.

Voluntary schools opened under the scheme of mass literacy are aided directly by Government whose liability on this account increased from 4½ lakhs in 1938–39 to over Rs. 8 lakhs at the end of the period under review. This additional liability is due not only to the increase in the number of voluntary schools but also to the more liberal scale of the grants now paid to these schools.

The contribution of District Local Boards to the increase in the number of Primary schools is also noteworthy. The increase of 744 District Local Board schools was due mainly to the opening of schools in villages with a population of 700 or over. There are 21,657 inhabited towns and villages in the Province of which 13,976, or 64·5 per cent., have schools, as against 8,975, or 41·4 per cent., five years ago. It will thus be seen that during the last five years more than 5,000 villages were provided with schools. On 31st March, 1942, there were some 170 villages with a population of 700 or over without a school, but it is reported that the educational needs of about 60 of these villages are served by schools in the neighbouring villages. A large number of such villages are in the Nasik and Ratnagiri Districts where the District Local Boards concerned are unable to open new schools. Efforts are being made to encourage voluntary associations to start schools in these villages. Details of villages with and without schools are given in Appendix IV published with this Report.

The average area served by a boys' Primary school declined from 6·7 to 4·2 square miles, and whereas there were ten schools for every 19 towns and villages at the end of 1937, there are now 10 for every 11. Of the total male population, the percentage under intruction was 10·5 against 9·2 in 1936–37.

7(3). The following table gives the distribution of boys and girls in the different standards of Primary schools on 31st March, 1942 :—

Stages of instruction.

—	Boys.	Percentage to total.	Girls.	Percentage to total.
1	2	3	4	5
Infants	348,496	30·6	165,995	38·9
Standard I	203,005	17·9	82,365	19·3
Standard II	190,976	16·8	67,568	15·8
Standard III	151,215	13·3	47,650	11·2
Standard IV	116,415	10·2	32,868	7·7
Total, Lower Primary stage ..	1,010,107	88·8	396,446	92·9
Standard V	55,928	4·9	14,097	3·3
Standard VI	38,300	3·4	8,762	2·1
Standard VII	33,541	2·9	7,439	1·7
Total, Upper Primary stage ..	127,769	11·2	30,298	7·1
Grand Total (Lower and Upper Primary stages). ..	1,137,876	100·0	426,744	100·0
Grand Total (Lower and Upper Primary stages) for 1936-37 ..	853,238	....	287,061	....

It will be seen that of every 100 boys and every 100 girls in Primary schools, about 89 boys and 93 girls were in the Lower Primary stage of instruction and that more than half of them were in the Infants class and Standard I. It must be remembered that a large number of schools teaching only the lower standards were opened only in recent years. Efforts are, however, being made to minimise stagnation by such methods as placing the Infants' class in charge of trained or experienced teachers, restricting fresh admissions to the Infants classes to the beginning of the term and giving additional teachers to understaffed schools.

The following table gives the percentage of pupils passing Standard IV to the number in Standard I four years ago :—

Year.	Boys.			Girls.		
	Number in Standard I.	Number passing Standard IV.	Percentage of pupils passing Standard IV to those in Standard I.	Number in Standard I.	Number passing Standard IV.	Percentage of pupils passing Standard IV to those in Standard I.
1933–34 ..	133,238	..	..	45,070	..	..
1937–38 ..	..	65,586	49·2	..	15,762	34·9
1934–35 ..	138,665	..	..	47,738	..	..
1938–39 ..	..	67,352	48·6	..	17,215	36·1
1935–36 ..	143,102	..	..	50,706	..	..
1939–40 ..	..	69,775	48·7	..	19,481	38·4
1936–37 ..	149,074	..	..	53,912	..	..
1940–41 ..	..	71,653	48·1	..	21,240	39·4
1937–38 ..	155,699	..	..	58,000	..	..
1941–42 ..	..	81,077	52·1	..	23,106	39·8

These figures shew some improvement but they are still a sad reflection on the efficiency of our Primary education.

Expenditure.

7(4). Direct expenditure on Primary schools increased by about Rs. 42 lakhs to over Rs. 219 lakhs. The following table gives the sources from which it was met :—

	1936–37.		1941–42.		Increase or decrease.	
	Amount.	Percentage.	Amount.	Percentage.	Amount.	Percentage.
	Rs.		Rs.		Rs.	
Government Funds ..	97,66,831	55·1	1,28,79,934	58·7	+31,13,103	+31·9
District Local Boards Funds	12,66,630	7·1	11,48,933	5·2	—1,17,697	—9·3
Municipal Funds	45,09,200	25·4	54,06,058	24·7	+8,96,858	+19·9
Fees ..	6,86,873	3·9	9,61,932	4·4	+2,75,059	+40·0
Other sources ..	15,06,968	8·5	15,27,712	7·0	+20,744	+1·4
Total ..	1,77,36,502	100·0	2,19,24,569	100·0	+41,88,067	+23·6

The increase of about Rs. 31 lakhs in the expenditure from Provincial funds was due mainly to the increased recurring liability on account of (1) the restoration of the cut applied to the grants payable to Local Authorities, (2) the grants paid to voluntary schools opened under the scheme of mass literacy, and (3) the grants paid to Local Authorities for unsanctioned but approved expenditure which was not previously admitted for grant. The increase of expenditure from Provincial funds accounts for the decrease of about Rs. 1,18,000 in the expenditure from District Local Board funds.

The total average cost of educating a pupil in a Primary school fell during the quinquennium from Rs. 16-0-0 to Rs. 13-13-0 and the cost to Government from Rs. 8-13-0 to Rs. 8-2-0. The decrease was due to the opening of a large number of relatively cheap voluntary schools. Details of the average cost per pupil in Primary schools under different management are given in Subsidiary tables 4 and 5 published in the Supplement to this Report.

Fee-receipts.

7(5). The total fee-collection in Primary schools in 1941-42 amounted to Rs. 9,61,932 which formed 4·4 per cent. to of the total expenditure on Primary schools, as against 3·9 per cent. in 1936-37. The following table compares the average annual fee per pupil in Primary schools under various managements :—

	1936-37. Rs. a. p.	1941-42. Rs. a. p.
Government	0 11 9	0 11 5
District Local Board	0 5 3	0 4 1
Municipal	0 4 7	0 4 1
Total under public management ..	0 5 1	0 4 1
Aided	3 3 1	1 10 5
Unaided	3 10 3	5 12 5
Total under private management ..	3 3 9	1 11 8
Grand Total ..	0 10 4	0 9 10

The apparent decrease in the average fee per pupil in aided schools was due to the opening of a number of voluntary schools which charge low fees or no fees at all.

No child is kept out of school for the inability of the parent or guardian to pay fees. All girls, and all children of the Backward classes and of school mistresses are exempt from the payment of fees. Children of Indian soldiers who died or were incapacitated during the last war and of Konkani Marathas in the Kolaba, Ratnagiri and Kanara Districts are also admitted free.

Of the 38 Local Authorities in the Province, 11 Municipalities and 5 District Local Boards have made Primary education altogether free, while 5 Municipalities and one District Local Board have made it partially free.

Buildings.

7(6). Details about the premises of Primary schools appear in Appendix V of this Report. Only about 28·3 per cent. of the District Local Board and Municipal boys' schools have their own buildings, while the remaining schools occupy either rented or rent-free buildings mostly unfit for school purposes. The housing of most of the Primary schools is a difficult problem which has engaged the attention of Government for some time. Except where philanthropic effort has come in to aid the Local Bodies have generally failed to house their Primary schools satisfactorily. Government since 1938 has helped with a special grant and District Building Committees have been established throughout the Province with the Divisional Educational Inspectors as Chairmen. These Committees try to acquire suitable sites and to arrange for the construction of school buildings in accordance with approved type plans. Since the introduction of the scheme a sum of about Rs. 12 lakhs was placed at the disposal of the District Building Committees. The payment of this amount was subject to the condition that a contribution equal to half of the Government grant was raised by the District Local Boards. Till the end of 1941-42, 155 school buildings were completed under the scheme, 122 were in progress, while the plans and estimates of 115 were approved.

Apart from the building operations of the District Building Committees, cheap building schemes financed by public spirited individuals have given valuable help in certain Districts. The Seth Mangaldas Girdhardas Cheap Building Fund scheme, the scheme financed out of the endowment fund of the late Rao Bahadur Girdharlal Uttamram in the Ahmedabad District, and the Sir Purushottamdas Thakurdas Scheme for the Surat District are progressing well. A further generous donation from Sir Purushottamdas Thakurdas has enabled his building scheme to be extended to the Panch Mahals District.

Teachers.

7(7). The total number of teachers in Primary schools under all managements increased by 11,425, or 33·1 per cent., to 45,957, of whom 38,330 were men and 7,627 women. The following table compares the qualifications of these teachers :—

	1936-37.			1941-42.		
	Men.	Women.	Total.	Men.	Women.	Total.
Trained ..	14,318	2,816	17,134	15,545	3,887	19,432
Percentage to total ..	49·2	52·0	49·6	40·6	51·0	42·3
Untrained ..	14,798	2,600	17,398	22,785	3,740	26,525
Percentage to Total ..	50·8	48·0	50·4	59·4	49·0	57·7
Total ..	29,116	5,416	34,532	38,330	7,627	45,957

Although there has been an increase of 2,298, or 13·4 per cent., in the number of trained teachers, the percentage of such teachers to the total number of teachers has decreased from 49·6 to 42·3. This is due mainly to the employment of a large number of untrained teachers in the voluntary schools opened under the scheme of mass literacy.

Since 1937, Government have endeavoured to extend facilities for the training of Primary teachers and of increasing the output of trained teachers. A scheme for the training of all teachers already in service below the age of 40 was put into effect and the training institutions were accordingly allowed to expand to their full capacity. As a result of this general expansion, the output of trained teachers is gradually increasing and it is expected that the percentage of trained teachers will increase in due course.

Pay of Teachers.

7(8). Primary teachers handed over to the Local Authorities under the Primary Education Act are paid at the rates sanctioned in 1924, while those appointed between 1923 and 1935 are paid either at the rates sanctioned in 1929 or according to the scales adopted by Local Authorities with the sanction of Government.

The Head Masters' and 1st Assistants' allowances were discontinued in 1939 under the orders of Government but these orders gave rise to various anomalies and a Committee—the Moos-Paranjpe Committee—was appointed by Government to examine the question of the pay and allowances of Primary teachers and to suggest ways and means of removing anomalies and hardships.

On the basis of the recommendations made by this Committee Government sanctioned—

(1) a basic scale of Rs. 25—1/2—30—1—40 for trained teachers appointed and trained after 1935;

(2) a personal allowance to be merged in increments in lieu of the Head Masters' and 1st Assistants' allowances for all those who were drawing these allowances prior to their discontinuance;

(3) a pay of Rs. 30 per mensem from 1st April, 1940, for those untrained Head Masters who had been drawing Rs. 30 prior to 30th June, 1923, but whose pay was subsequently adjusted owing to the abolition of Head Masters' allowances.

Shift System.

7(9). Seventeen District Local Boards and eleven Local Authority Municipalities have adopted the Shift system and introduced it in some of their Primary schools. The system is at present being tried in 1,258 Disrict Local Board schools and in 101 Municipal schools. There is considerable divergence of opinion about the value of the experiment. Although it apparently reduces the number of teachers required, the experiment has not proved an unqualified success and a number of School Boards that have ntroduced it are thinking of giving it up.

Courses of study.

7(10). The curriculum for Primary schools had been much criticised in recent years. The course (*sic*) was far too literary and very little was done to develop the child's power of observation and reasoning. The curriculum was revised and introduced from 1940 in the Infants class and Standard I of all Primary schools. It has been introduced progressively in the upper standards. The main feature of the new curriculum is that the treatment of each subject is made as practical as possible and a wide range of topics has been given in all subjects from which teachers may make selection to suit local requirements. A simplified course intended to meet the needs of small village schools was also drawn up. This course is being followed by the majority of the voluntary schools and a large number of one-teacher schools.

Basic education was introduced in this Province in 1939 to meet rural needs. Government appointed a Committee to advise them on the subject and the Committee selected compact areas in the different Divisions for the opening of basic schools. The syllabus adopted for these schools is based on the "Wardha" scheme, and the only craft work attempted is spinning and carding. In addition to the basic craft, children receive instruction in the mother tongue, Arithmetic, Social studies, including History and Civics, Geography, General Science and Drawing. The teaching is based on craft work but the main craft selected is not suitable for all schools and the general work is considerably handicapped by want of suitable books, charts, etc.

Eighty-five basic schools were opened in the beginning but some had to be closed on account of unsatisfactory progress, and on 31st March, 1942, there were 63 basic schools attended by about 4,100 pupils. The whole question of Basic education in this Province is under the consideration of a special Committee appointed by the Central Advisory Board of Education at the request of Government.

Education of the Agricultural classes.

7(11). The Agricultural-bias classes have amply justified their existence as normal educational institutions catering to the needs of the agricultural communities.

The experiment of introducing an alternative curriculum with an agricultural bias in the three upper standards of Primary schools was first tried in this Province in 1923. The object of the experiment was to adapt Primary education to rural needs. These classes follow a special curriculum with an agricultural bias and a small farm is attached to each class for practical work.

In spite of the general recognition of the useful purpose served by these classes their number has been practically stagnant for some years owing mainly to the inability of the Local Authorities to find funds for new classes. On 31st March, 1942, there were 81 Agricultural-bias classes attended by over 4,300 pupils.

The number of pupils who passed the Primary School Certificate examination with an agricultural bias more than doubled during the period under review. At the examination held in 1942, 1,139 boys appeared, of whom 622, or 54·6 per cent., passed. It is reported that over 1,600 lads have taken to agriculture after completing the course.

Since the abolition of the post of Inspector of Agricultural Schools in 1938, these classes are supervised and inspected by ordinary Assistant Deputy Educational Inspectors, and although they are visited occasionally by senior officers of the Agricultural Department the position in regard to the supervision and inspection of these classes is far from satisfactory. The question of placing these classes in charge of special Assistant Deputy Educational Inspectors with agricultural qualifications is under consideration.

Examinations.

7(12). On the resumption by Government of the control of the Inspecting staff a change was made in the system of examinations of Primary schools. The examination work is now organized by the Administrative Officer in consultation with the Deputy Educational Inspector and the Government Inspecting staff. Ordinarily the examination of Primary schools is left to Head Masters, and the results are scrutinized by the Inspecting Officers at the time of the annual inspection.

The final examination at the end of the Primary school course is the Primary School Certificate examination and is held annually at various centres. The Primary School Certificate is the minimum qualification for Primary school teachers and for admission to Primary Training institutions and to the lower grades of the public service.

The number of candidates for the examination is increasing from year to year. The following table gives the results of the examinations for boys and girls held in 1937 and 1942 :—

	Primary School Certificate examination with					
	Regional languages.			Urdu.		
	Number appeared.	Number passed.	Percentage of passes.	Number appeared.	Number passed.	Percentage of passes.
1937						
For Boys ..	20,420	7,717	37·8	1,221	489	40·0
For Girls ..	5,091	1,942	38·1	256	71	27·7
1942						
For Boys ..	30,760	15,799	51·4	1,787	889	49·7
For Girls ..	6,825	2,949	43·2	334	161	48·2

School Co-operative Societies and Libraries.

7(13). The main object underlying the maintenance of School Co-operative Societies is to inculcate in young minds the principles of self-help, co-operation and thrift. These societies are reported to be growing in popularity and are gradually increasing in number from year to year. On 31st March, 1942, there were 714 Co-operative Societies attached to Primary schools, as against 620 five years ago.

The educational value of school libraries equipped with suitable books and other reading material cannot be overemphasised. The Local Authorities are reported to be doing the best they can, with the means at their disposal, to provide suitable reading material for children. In the Central Division the District Local Boards of East and West Khandesh have opened a number of pupils' libraries, while under the Bal Library Scheme introduced by Sir Purushottamdas Thakordas about 400 pupils' libraries have been opened in the Surat District. An account of the Village Library Scheme sanctioned by Government in 1941 is given in the chapter on Adult Education of this Report.

School Book Committees.

7(14). In addition to the four School Book Committees for each of the Regional Languages, there is a Provincial Board for Education in Hindustani constituted in 1939. These Committees advise the Department on the suitability of books for use in schools. The following table summarises the work done by them :—

——	Number of books received including the opening balance.	Number of books disposed of		Balance.
		Sanctioned.	Rejected.	
Urdu School Book Committee	47	42	5	....
Marathi do. ..	278	232	46	....
Gujarati do. ..	405	325	22	58
Kannada do. ..	60	60	....	....
Total for 1941–42 ..	790	659	73	58
Total for 1936–37 ..	939	722	179	38
Provincial Board for Education in Hindustani (1941–42).	56	53	3	....

The Bombay Municipality.

7(15). Primary education in Bombay City is governed by the City of Bombay Municipal Act, and the schools are managed by a Schools' Committee of the Municipal Corporation.

The total number of Primary schools in Bombay City increased by 121 to 613 and the number of pupils by 16,487, or 17·1 per cent., to 113,098. The increase was due partly to normal expansion and partly to increased enrolment under the scheme of compulsory education, which has since been extended to all the wards of the City.

There were 2,960 ordinary teachers of whom 1,673, or 54·5 per cent., were trained. In addition to the ordinary teachers, there were 115 special teachers for Drawing, Drill, Music etc. To meet the demand for trained teachers the Marathi training class, which had been closed as a measure of retrenchment, was revived as a separate institution.

The total direct expenditure on all Municipal and approved schools in Bombay City increased by about Rs. 10·9 lakhs to Rs. 49·7 lakhs. A grant of Rs. 9,45,000 was paid by Government to the Municipality in 1941–42.

Cantonment Schools.

7(16). Under the Cantonments Act, 1924, provision to meet the educational needs of the residents of Cantonment areas is made by the Cantonment Authorities. All the six Cantonments in this Province either maintain their own schools or pay grants-in-aid to approved schools within their limits. In 1941–42 there were 31 Primary schools in Cantonment areas, of which 7 were maintained by Cantonments, 24 were aided and 2 unaided. These schools were attended by 6,636 children. All these schools are inspected by the Government Inspecting Officers.

Details of the provision made by each Cantonment Authority for Primary education within its jurisdiction are given in Appendix VI published with this Report.

Compulsory Education.

7(17). Under the Primary Education Act, 1923, it is open to a Local Authority to introduce compulsion in its area in respect of Elementary or Primary education. The scheme of compulsory education introduced by the Bombay Municipality is governed by the City of Bombay Primary Education Act. The Municipality introduced compulsion in the F and G Wards in 1925 and in 1940 extended the scope of the scheme to all the wards of the City. In addition to the Bombay Municipality, ten Local Authority Municipalities and two District Local Boards have introduced compulsion.

Appendix VII published with this Report summarises the effect of the schemes of compulsion introduced by the various Local Authorities. These details shew that the progress leaves much to be desired. The percentage of attendance of schools in some of the compulsory areas is no better than the average for schools in voluntary areas. The drop in attendance in the Bombay Municipal schools was, however, due to the sudden exodus of mill operatives and others as a result of the general air raid scare in the City at the beginning of 1942. The figures in the Appendix further shew that except in isolated cases no coercive measures beyond the issue of notices were taken by the Local Authorities.

7(18). One of the important features of the period under review was the amendment of the Primary Education Act 1923. The main features of the amended Act have been summarised in my Report for 1938–39.

The Primary Education Act.

The amended Act provides for the bifurcation of Administration and Inspection so as to ensure a closer inspection of Primary schools by the Government Inspecting staff. With the transfer of the Inspecting staff to the Department the Inspecting Officers receive instructions and guidance from the Deputy Educational Inspector who forms a link between the Inspecting staff and the School Board Administrative Officer. With an Inspecting staff suitably strengthened and controlled by Government it has been possible to intensify the inspection and supervision of Primary schools and there are indications of a definite improvement in the general tone and standard of instruction in Primary schools.

Under the amended Act definite powers in regard to the appointment and control of the teaching staff were transferred to the Administrative Officer. This led in the beginning to a certain amount of friction between the School Board and the Administrative Officer. A conference of the Chairmen of School Boards and the Inspecting Officers of the Department was held in October, 1939, for a free exchange of views on certain problems arising out of the amended Act and helped to remove the misunderstanding prevailing about the powers and privileges of the Administative Officer and the School Board Chairman. The School Boards have now adjusted themselves to the changes introduced and there are signs of better co-operation between them and the Administrative Officers in the administration of Primary education. The Educational Inspector, B.D., summarises the position in the following remarks :—

" The arrangement has been found to be working smoothly and " satisfactorily though for some time in the beginning there was a sort " of rancour and displeasure among the Boards at the thought of " parting with the powers owing to the amended Act. There are " now very rare instances of disagreement between the Boards and " their Administrative Officers ".

7(19). The Board of Primary Education was constituted in January, 1940, under section 2-A of the amended Primary Education Act. Till the end of the period under review the Board held 21 meetings to discuss various problems connected with Primary education referred to them by Government and have made valuable suggestions on their own.

Provincial Board of Primary Education.

CHAPTER VIII.

Training of Teachers.

I. *Training of Secondary Schools Teachers.*

8(1). Four new Secondary Training institutions opened during the period under review and the total number of these institutions rose to six. Five of these are affiliated to the University for the B. T. degree and one gives training in physical education. Three institutions (including the Training Institute for Physical Education, Kandivli), are maintained by Government, two by Indian States and one by a Society. Besides these training institutions, there are two normal schools which train mistresses for European and Secondary (English) schools, and eleven Training centres recognised for the preparation of candidates for the Departmental S. T. C. Examination.

II. *Training of Primary Teachers.*

8(2). Thirteen new training institutions—10 for men and 3 for women—were started during the period under review bringing the total number of institutions to 39. Of these, 21 are for men and 18 for women.

Number of institutions and students.

Of the 10 new Training institutions for men, 4 were started by Government, 2 by Local Authority Municipalities and 4 by private bodies. The Government High Schools at Ratnagiri and Surat were converted into Training institutions and two Government Training institutions were newly started at Katargam and Dharwar for teachers for Basic schools. The Rural Training School, Loni, was also converted into a Basic Training Centre. An Urdu Basic Training Centre was started at Jalgaon in June, 1939, but it had to be closed later. The remaining 6 new Training institutions for men include 2 Municipal institutions at Bombay and Poona and 4 institutions started by private bodies at Nasik, Jalgaon, Dharwar and Belgaum.

The 3 new Training institutions for women are the Government Training College at Nasik, the Bal Adhyapan Mandir started by the Shishu-Vihar Mandal at Dadar for pre-primary and Kindergarten school teachers and the Archbishop Roberts Kindergarten and Primary

Training College for teachers working in the Primary departments of Secondary (English) schools.

In addition to this increase in the number of Training institutions, the old Training institutions, both Government and non-Government, were allowed to train a larger number of teachers with a view to training all teachers under 40 within a period of ten years. As a result of this all-round expansion in training facilities, the number of teachers under training on 31st March, 1942, was over twice the number at the end of the year 1936-37. The following table gives their classification by communities :—

	Indian Christians	Hindus				Muslims	Parsis	Others	Total
		Advanced	Intermediate	Backward					
				Scheduled Classes	Other Backward Classes				
Institutions for Men ..	110	665	1,021	148	94	248	..	37	2,323
Institutions for Women	313	599	276	42	21	88	36	29	1,404
Total ..	423	1,264	1,297	190	115	336	36	66	3,727

In 1936–37 the total output of the various Training institutions was 804 men and 305 women, and the corresponding figures for the year 1941–42 were 1,531 and 710.

Courses of Studies.

8(3). The courses of studies for both men and women teachers were revised in June, 1939. Instead of three years' training of an intermittent nature in the case of men, a two year continuous course was introduced. The period of training for women teachers, however, was not changed and the three year course maintained, the First Year Certificate being granted to them after a continuous training of 2 years. This differentiation between the training of men and women teachers is due to the fact that most of the existing women teachers coming for training passed the Primary School Certificate examination from standard VI unlike boys who appear for the Primary School Certificate examination from standard VII. This distinction will disappear in course of time when the Primary School Certificate examination for girls is brought to the standard of the Primary School Certificate examination for boys.

8(4). The following table shows the classification by languages of the Primary Training institutions for men and women :—

Classification by languages and special features.

	Number of institutions for							Number of students in institutions for						
	Men			Women			Grand Total	Men			Women			Grand Total
	Government	Non-Government	Total	Government	Non-Government	Total		Government	Non-Government	Total	Government	Non-Government	Total	
1. Marathi ..	5	6	11	2	7	9	20	704	624	1,328	213	607	820	2,148
2. Gujarati ..	3	1	4	1	3	4	8	314	38	352	105	274	379	731
3. Kannada ..	2	2	4	1	..	1	5	274	181	455	73	..	73	528

5. English ..	..	..	..	..	1	1	1	..	..	..	..	50	50	50
Total ..	12	9	21	5	13	18	39	1,480	843	2,323	453	951	1,404	3,727

Of the 39 institutions, 1 is a Vocational Training School, 3 are Basic Training centres, 3 Kindergarten Training schools and 32 ordinary Training institutions.

Expenditure.

8(5). The expenditure on Primary Training institutions increased to Rs. 6,19,701 from Rs. 4,58,560 for the year 1936-37. Of the total expenditure, 77·8 per cent. was defrayed from Provincial funds, while the remainder from Municipal funds, fees and other sources. The average annual cost of training in a Government institution for men was Rs. 176, against Rs. 267 five years ago, while the cost for women was Rs. 301, against Rs. 535. The corresponding figure in the case of an aided institution for men was Rs. 103, against Rs. 159 in 1936-37 and for women Rs. 147 against Rs. 166. The decrease in cost is due to the increase in the number of students admitted to Training institutions.

Duty pay, stipends, etc.

8(6). The present scheme of training aims at training all teachers in service within the age limits of 22 and 40, and in order to encourage teachers to go up for training Government decided to pay "duty pay" to all permanent Local Authority teachers under training. The stipends paid to them in the past were not considered adequate. The Primary Education Rules have been accordingly amended and it is now obli-

gatory on a Local Authority to pay every permanent teacher his grade pay for the period of training. Temporary teachers or candidates deputed by the Local Authorities for training receive the usual stipends from Provincial funds.

No fees are charged in Government Training institutions. Fees on account of Backward class candidates studying in non-Government Training institutions are paid by Government. A few scholarships of the value of Rs. 6 per mensem tenable for the full course of training are also awarded to Backward class students.

General.

8(7). The revised courses of study in the Training institutions introduced from June, 1939, have proved successful. Hindustani is now one of the subjects taught in all Training institutions except the Urdu Training institutions.

Aided Training institutions are utilized for the training of Local Authority teachers in service with a view to expediting the completion of the programme of training these teachers. The fees charged are paid by Government. The admission of Matriculates to the second year class, as an experimental measure, has worked satisfactorily. This has resulted in attracting a good number of Matriculates for service in Primary schools.

Special refresher courses for women teachers in girls' Primary schools were held at various centres in 1938 and 1940. Short-term training camps were also held by private associations running voluntary schools. These camps attempted to give training in education, psychology, hygiene, etc.

CHAPTER IX.

Special Schools and Classes.

9(1). The institutions dealt with in this Chapter impart instruction in Technical and allied subjects. The standard of instruction and the qualifications for admission vary according to the nature and duration of the course. Some of these institutions are under the control of other Departments. A statistical summary of these institutions is given below :—

	1936-37		1941-42	
	Number of institutions	No. of pupils	No. of institutions	No. of pupils
Commercial Schools ..	29	1,842	31	1,545
Engineering, Technical and Industrial schools.	60	3,872	90	5,232
Agricultural schools ..	3	77	4	122
Medical schools	3	850	3	612
Art Schools	3	692	3	726
Language schools	41	1,983	46	1,706
Music schools	9	167	13	438
Other Special schools ..	2	133	19	682
Gymnasia	....	....	113	9,446

There has not been an appreciable increase in the number of pupils and it would appear that vocational education as at present imparted in these Special schools is not viewed with favour by the general public.

A—Commercial Schools.

9(2). The number of institutions increased from 29 to 31, while the number of pupils decreased from 1842 to 1545. These institutions provide instruction in various Commercial subjects and prepare candidates for the London Chamber of Commerce and Government Commercial Diploma and Certificate examinations. They also cater for those desiring to improve their prospects by additional training in Commercial subjects.

There are both Day and Evening Classes in Commercial subjects at the Elphinstone High School, Bombay. The average number of pupils increased from 63 in 1936–37 to 66 in 1941–42. The total fee receipts were Rs. 4,741 in 1936–37, as against Rs. 5,585 in 1941–42. The total expenditure on the classes in 1941–42 was Rs. 5,703 showing an extra cost of Rs. 188 to Government.

In the J. D. Vakil Commercial School, Broach, the average number of pupils decreased from 58 in 1936–37 to 43 in 1941–42. The total fee receipts were Rs. 1,833 in 1936–37, as against Rs. 1,476 in 1941–42. The total expenditure of the school in 1941–42 was Rs. 3,762, of which Rs. 677 was entirely borne by Government.

London Chamber of Commerce Examinations.

9(3). These examinations are now held in three stages—(*i*) Elementary, (*ii*) Certificate and (*iii*) Higher Certificate. The Elementary stage examination was introduced for the first time in 1938. At the Higher Certificate examination the number of candidates was 600 in 1941, as against 559 in 1937.

Government Commercial Diploma and Certificate Examinations.

9(4). Of the 124 candidates who appeared for the Diploma Examination held in April, 1942, 55 passed. At the Certificate examination out of the 263 candidates who appeared, 158 passed in one or more subjects.

To improve the standard of stenography in the Province, a Higher Proficiency Certificate examination in Shorthand at speeds varying between 120 to 160 words a minute, was instituted in 1940. Of the 41 candidates who appeared for the examination held in 1942, 30 passed at different speeds.

B—Technical and Industrial Schools.

Diploma Classes attached to the College of Engineering Poona.

9(5). The Diploma Classes attached to the College of Engineering, Poona, are the only classes of the kind under the control of this Department. The number of pupils on the rolls increased from 252 in 1936–37 to 275 in 1941–42. The results of the examinations held in March, 1942, were as under :—

	No. appeared.	No. passed.
Diploma in Civil Engineering	54	50
Diploma in Mechanical and Electrical Engineering	31	30

9(6). The Technical and Industrial schools in the Province are under the control of the Department of Industries and an account of the progress of these institutions will be found in the Report published by that Department. The tables published with this Report and in the Supplement to it give statistical details of these institutions.

Other Industrial Institutions.

9(7). Apart from the schools under the control of the Department of Industries, there were 42 Industrial schools or classes under the control of this Department. Most of them are for women and impart instruction in sewing,

tailoring, embroidery, knitting, first aid, fancy work, etc., Grants amounting to Rs. 11,875 were paid to these classes in 1941–42.

V. J. Technical Institute, Bombay.

9(8). The V. J. Technical Institute is the premier Technical Institute in this Province and follows a course covering a period of four years in (1) Mechanical Engineering, (2) Electrical Engineering, (3) Textile Manufacture, (4) Technical and Applied Chemistry and (5) Sanitary Engineering and Plumbing. The number of students in 1941–42 was 602, as against 537 in 1936–37.

Committee of Direction for Technical and Industrial Training.

9(9). The general control of Technical and Industrial education is in the hands of the Committee of Direction for Technical and Industrial Training.

The number of schools under the Committee's control was 78 in 1941-42, as against 58 in 1936–37. These institutions follow different courses approved by the Committee.

The total expenditure of the Committee in 1941–42 was Rs. 17,769, of which Rs. 3,500 was incurred on establishment, Rs. 5,167 on inspection and Rs. 9,102 on examinations.

Government Technical Institutions.

9(10). The Government Technical institutions under the Department of Industries are the R. C. Technical Institute, Ahmedabad, the Government Tanning Institute, Bandra, the Government Leather Working School, Bandra and the Government Handweaving Institute, Poona. In addition to these institutions, the Government Apprentice scheme was inaugurated by the Department of Industries for the first time in 1937–38 in the Cities of Bombay and Ahmedabad. The object of this scheme is to provide an opportunity for an industrial carreer for young men who have received general education upto the pre-matriculation standard. This scheme provides for intensive practical training for 3 to 5 years in mills, factories, etc.

C—Agricultural Schools.

9(11). Two Agricultural schools are maintained by the Agricultural Department—one at Dhulia in the West Khandesh and the other at Devihosur in the Dharwar District. These schools impart instruction in Agriculture on modern and practical lines.

There are also two Agricultural schools under private management—one at Rajapur in the Ratnagiri District and the other at Puntamba in the Ahmednagar District—which follow a higher course of instruction in agriculture. These schools are in receipt of grants from this Department.

D—Medical Schools.

9(12). The Medical Department continued to maintain Medical Schools at Poona and Ahmedabad. In addition to these schools, the National Medical College, Bombay, which is a recognised institution, prepares candidates for the L.C.P.S.

E—Veterinary College.

9(13). The Veterinary College, Bombay, which is the only institution of its kind in this Province, teaches a course of three years leading to the G.B.V.C. On 31st March, 1942, there were 91 students in the college.

F—Art Schools.

9(14). The Sir J. J. School of Art had 693 students on the rolls on 31st March, 1942, and 95 in the Reay Art Workshop. Full details of the state and progress of the school will be found in the report published by the Director of the school.

Drawing and Design Classes.

9(15). The Drawing and Design Class attached to the R. C. High School, Ahmedabad, had 21 pupils on the rolls in 1941–42, as against 30 in 1936–37.

The Drawing and Design Class, Surat, was closed in 1941–42, while the School of Art, Dharwar, which is under Private management, has been newly recognised.

G—Music Schools.

9(16). On 31st March, 1942, there were 13 Music schools with 438 pupils as against 9 with 167 pupils in 1937.

H—Gymnasia.

9(17). The gymnasia were taken on the list of recognised Special institutions for the first time in the year 1938–39. The number of recognised gymnasia during the year 1941–42 was 113 with 9,446 pupils in them. A total grant of Rs. 9,890 was paid to these gymnasia in the year 1941–42.

CHAPTER X.

Oriental Studies.

10(1). The study of a classical language begins in Standard IV of a Secondary school and continues up to the degree examinations in Arts. The results of the various University examinations held during the Quinquennium shew that Sanskrit and Persian retain their popularity. While provision for the teaching of these languages is made in most of the educational institutions, arrangements for the teaching of other classical languages also exist in some of the institutions.

Apart from the instruction in oriental languages imparted in ordinary educational institutions, there are special institutions known as Pathashalas for the study of Sanskrit and Maktabs for the study of Persian and Arabic. The following table compares the number and enrolment of these institutions in 1937 and 1942 :—

	Number of institutions.		Number of pupils.	
	1937	1942	1937	1942
Pathashalas	56	56	1,965	1,751
Maktabs	69	36	3,516	3,235

With the exception of a few Pathashalas which follow a higher course in Sanskrit and prepare candidates for the examinations of Calcutta Sanskrit Association and for the Elementary and Intermediate examinations of the Government Sanskrit College, Benares, most of the Pathashalas follow an elementary course. The instruction imparted in Maktabs is mainly restricted to the reading of the Koran.

Oriental Institutions.

10(2). Among the institutions which aim at the advancement of research in oriental literature, the Deccan College Post-graduate and Research Institute, Poona, the Bhandarkar Oriental Research Institute, Poona, the K. R. Cama Oriental Institute, Bombay, and the Bombay Branch of the Royal Asiatic Society, may be specially mentioned. These institutes maintain valuable libraries of rare manuscripts, books, etc., which are lent to scholars from India and abroad. Scholarships and prizes are awarded for original research and eminent scholars are invited to deliver lectures on Oriental subjects.

The Bhandarkar Oriental Research Institute which has undertaken to publish a critical edition of the *Mahabharata*, completed four *Parvans* of the epic during the quinquennium. Out of the 10,000 pages which the critical edition is expected to cover, about 3,400 pages have so far been published. A special grant of Rs. 14,000 was made by Government to the Institute during the quinquennium for the work.

There are also other research Institutes or Societies doing useful work in their own fields. The Indian Historical Research Institute at St. Xavier's College, Bombay, the Karnatak Historical Research Society and the Bharat Itihas Samshodhak Mandal, Poona, aim at research in historical subjects, while the Mimamsa Vidyalaya, Poona, is interested in a critical study of the Mimamsa Shastra. The Bharatiya Vidya Bhavan, Bombay, started in 1938 covers a wide field of research in Indology and other allied subjects.

The Kannad Research Institute was established during the quinquennium at Dharwar for research in Kannad literature. An account of this Institute is given in Chapter IV. The Gujarat Research Society is also doing similar useful work in Bombay.

CHAPTER XI.

VISUAL INSTRUCTION.

Introduction.

11(1). During the Quinquennium Visual Instruction continued to be in charge of a special Deputy Educational Inspector in the Bombay Educational Service Class II. This officer looks after the magic lanterns of the Department and arranges for the preparation and distribution of slides and lecture notes. He also holds a training course in Visual Instruction for Secondary teachers at the Secondary Training College, Bombay, guides teachers and Inspecting Officers in lantern lecturing work, and delivers lantern lectures himself.

Magic lanterns.

11(2). In addition to the 115 magic lanterns in his charge, the Inspector for Visual Instruction was supplied with a Cinema projector and a few films during the quinquennium. During last year twenty-six new magic lanterns were placed at his disposal for the use of Inspecting Officers in connection with rural development work. Seven District School Boards and 13 Municipal School Boards had magic lanterns of their own, while magic lanterns owned by non-Government Secondary schools numbered 97, an increase of 13 during the quinquennium. This increase would have been greater but for the general rise in prices.

Slides.

11(3). At the end of the quinquennium the Department of Visual Instruction had 718 sets comprising 36,807 slides, as against 693 sets comprising 35,261 slides in 1937. Two sets consisting of 122 slides were added during the last year of the quinquennium. Of the 718 sets, 570 are equipped with lecturenotes. These sets are distributed by the Inspector for Visual Instruction to educational institutions and the Inspecting Officers with due regard to their requirements. A small Departmental Committee was set up during the quinquennium to examine and scrap unserviceable slides and to suggest ways and means of improving the circulation of slides.

General.

11(4). In 1941-42 over 3,000 magic lantern lectures were delivered by teachers in Government educational institutions and by the various Inspecting Officers. Many of the lectures delivered by these officers covered topics connected with rural uplift, public health, sanitation, adult education, war publicity and air raid precautions.

CHAPTER XII.

Education of Girls.

Institutions and pupils.

12(1). The increase in the number of girls under instruction at the end of the last quinquennium was not only maintianed but there has been a further marked increase in the enrolment of girls attending various types of educational institutions.

The total number of institutions for girls increased by 542 to 2,223, and the number of pupils by 67, 270 to 270,945, of whom 8,271 were boys and 262,674 were girls. In addition to these, there were 227,663 girls attending institutions for boys. The total number of girls under instruction in all kinds of institutions on 31st March, 1942, was thus 490,337, as against 326,571 in 1937. The increase of 163,766, or over 50 per cent. is noteworthy. The following table gives details for each Division :—

—	Number of institutions for girls.	Number of pupils in institutions for girls.	Number of boys in institutions for girls.	Number of girls in institutions for girls.	Number of girls in institutions for boys.	Total number of of girls under instruction (columns 5 + 6).
1	2	3	4	5	6	7
Bombay Division.	572	78,026	2,571	75,455	68,094	143,549
Central Division.	586	73,521	2,117	71,404	72,919	144,323
Northern Division	640	68,831	1,361	67,470	41,711	109,181
Southern Division.	387	40,460	446	40,014	42,448	82,462
European Schools.	19	3,258	475	2,783	656	3,439
Secondary (English) Schools.	19	6,849	1,301	5,548	1,835	7,383
Total for 1941–42.	2,223	270,945	8,271	262,674	227,663	490,337
Total for 1936–37.	1,681	203,675	6,634	197,041	129,530	326,571

The detailed returns shew that the increase in the number of girls under instruction was shared by all the main communities. According to the Census of 1941 the total female population of the Province was 10,032,507. The percentage of girls under instruction to the total female population is 4·89, against 3·79 in 1937. The corresponding figures for the male population are 12·62 and 10·86.

Expenditure.

12(2). It is not possible to return separately the amount spent on the education of girls. Almost 47 per cent. of the girls attend boys' schools. The expenditure on institutions specially intended for girls rose by Rs. 16,10,460 to Rs. 66,93,325, of which 36·0 per cent. was met from Government funds, 28·6 from District Local Board and Municipal funds, 19·4 from fees, and 16·0 from other sources.

Higher Education.

12(3). Of the 3,025 women receiving higher education on 31st March, 1942, 2,727 were attending Arts and Science colleges and 298 Professional colleges. The following table compares the position in 1936–37 and 1941–42 :—

	1936–37.	1941–42.
Arts and Science	1,059	2,727
Professional—		
Secondary Training ..	21	75
Commerce	5	25
Law	18	11
Medicine	140	185
Engineering	..	1
Agriculture	2	..
Technology	..	1
Total Professional ..	186	298
Grand Total ..	1,245	3,025

Government of India Table VIII published with this Report gives the number of women who passed the various University examinations in 1941–42.

S. N. D. T. Indian Women's University.

12(4). The Indian Women's University which is not a statutory body had four colleges affiliated to it and they were attended by 267 women, as against 210 in 1937. The University has also 19 Secondary schools affiliated to it, and on 31st March, 1942, they were attended by 4,576 girls.

The institutions affiliated to the University follow courses of studies specially designed to meet their requirements. The mother tongue is used as the medium of instruction, English being a compulsory subject.

The degrees conferred by the University have been recognised by Government for the purpose of appointments to Government and semi-Government service.

The University has been in receipt of an annual Government grant of Rs. 5,000 since 1939–40.

Secondary Education.

12(5). The number of recognised Secondary schools for girls rose by 44 to 148 and the number of pupils in them by 9,826 to 31,219, of whom 29,208 were girls. In addition, there were 14,091 girls in boys' schools, raising the total number of girls under instruction in Secondary

schools to 43,299, an increase of 17,479, or 67·7 per cent., during the quinquennium.

Of the 148 Secondary schools for girls, 7 are maintained by Government all of which are High schools. Of the 141 non-Government schools, 12 (English classes) are maintained by Local Bodies and 129 schools by various private bodies.

Teachers.

12(6). On 31st March, 1942, 75 women were attending the Secondary Training colleges, while 69 women obtained the B. T. degree in 1941–42. There were 2,092 women teachers in Secondary schools, as against 1,414 five years ago. In spite of this increase, the dearth of women graduates is still keenly felt. Most trained graduate women seek employment in large towns and the mofussil schools have, therefore, to appoint men teachers for want of suitable women teachers.

Curriculum.

12(7). Most Secondary schools for girls follow the curriculum for boys' schools and send up girls for the Matriculation examination of the Bombay University. Of the 2,707 girls who appeared for the Matriculation examination held in April, 1942, 1,602, or 59·2 per cent., passed.

Primary Education.

12(8). The number of Primary schools for girls increased by 213 to 1,691 and the number of pupils by 52,923 to 229,140. The increase in the number of schools was due partly to normal expansion and partly to the scheme of private approved Primary schools started in 1938–39. Of the 229,140 pupils in girls' schools, 5,758 were boys and 223,382 girls. In addition, there were 203,362 girls in Primary schools for boys, raising the total number of girls under instruction in Primary schools to 426,744. As in Secondary schools, the increase in the number of girls under instruction in Primary schools was shared by all the communities, particularly by the Intermediate and Backward Hindus.

Curriculum.

12(9). With a view to raising the standard of Primary education of girls, standard VII was added to Primary schools for girls from June, 1938, and the whole curriculum revised with a view to introducing practical subjects suitable for girls.

Primary School Certificate Examination for girls.

12(10). The total number of girls appearing for the Primary School Certificate examination increased from 5,347 in 1937 to 7,159 in 1942, of whom 334 appeared for the Urdu Primary School Certificate examination. Of the total number, 3,110, or 43·4 per cent., passed.

Teachers.

12(11). The total number of women teachers in all kinds of Primary schools for boys and girls increased during the quinquennium from 5,416 to 7,627, of whom 3,887, or 51 per cent., were trained. Full details of the qualifications of women teachers in Primary schools are given in Government of India Table VI-B and in Appendix VIII published with this Report.

12(12). The housing problem for girls' Primary schools continues to be difficult. The figures returned in Appendix V of this Report shew that of the 1,031 buildings in which District Local Bord girls' schools are held, 765 are rented, the corresponding figures for Municipal schools being 374 and 310. Most of the rented buildings were built for other purposes and are not suitable for schools.

School Buildings.

12(13). An account of Training institutions for women appears in Chapter VIII. Apart from the adult education classes for women, there were 54 special institutions for grown up girls, as against 30 in 1937, which provide instruction in useful arts and crafts such as sewing, embroidery and needlework, painting, toy-making, laundry, cookery etc. These institutions cater for women who cannot join ordinary institutions.

Special Institutions.

12(14). The quinquennium was one of steady progress shewing an increase of 50 per cent. in the number of girls under instruction. The revised curriculum and the addition of one year to the Primary course is steadily improving the standard of work in girls' schools.

General.

CHAPTER XIII.

Anglo-Indian and European Education.

Introduction.

13(1). In this Province European schools are governed by a special Code of Regulations and separate provision for grant to these schools is made in the Educational budget. European schools cater for European or Anglo-Indian children but they are allowed to admit non-Europeans up to a limit of 40 per cent. This limit was raised from 30 per cent. during the quinquennium.

Schools and Pupils.

13(2). The total number of European schools remained the same, viz. 32. Of these, 29 were Secondary schools, two were Training Institutions and one was a Commercial school maintained by the Young Women's Christian Association for Anglo-Indian and European girls wishing to have a business career. The number of pupils in these 32 institutions increased during the quinquennium by 1,017 to 6,276, of whom 4,296 were Europeans and Anglo-Indians, and 1,980 belonged to the various non-European communities. In addition to the 4,296 European and Anglo-Indian pupils, there were 1,284 in other educational institutions, raising the total number of European and Anglo-Indian pupils under instruction to 5,580 as against 5,184 in 1937.

Expenditure.

13(3). The total expenditure on Anglo-Indian and European Education increased by Rs. 3,35,990 to Rs. 16,24,354, of which 30·9 per cent. was met from Government funds, 54·4 per cent. from fees, and 14·7 per cent. from other sources. The maintenance grants payable to European schools are now limited to Rs. 100 per boarder and Rs. 75 per day scholar.

Teachers.

13(4). The total number of teachers in European schools increased during the quinquennium by 58 to 394, of whom 318, or 80·7 per cent., were trained, as against 78·0 per cent. at the end of the last quinquennium. This increase was consequential on the increase in the number of pupils.

There are two European Training institutions for women in this Province, viz., St. Mary's Training College, Poona, and St. Margaret's Training College, Bombay, which prepare candidates for the Bombay European Schools Teachers' Diploma and the Departmental Kindergarten examinations. The latter also prepares candidates for the Secondary Teachers Certificate examination. There are no European Training institutions for men in this Province and teachers from European schools attend the Chelmsford Training College, Ghoragalli in the Punjab. Five teachers from this Province were deputed to the College during the quinquennium on a monthly stipend of Rs. 60. Three of them have since completed their training.

13(5). The Cambridge Local examinations, the Departmental Kindergarten and the Bombay European Schools Teachers' Diploma examinations were held during the quinquennium at various centres in this Province. The following table compares the results of the examinations held in 1942 and 1937 :—

Examinations.

Examination.	1942.			1937.		
	Number appeared	Number passed.	Percentage.	Number appeared	Number passed.	Percentage.
1	2	3	4	5	6	7
Cambridge Local Examinations—						
School Certificate ..	262	208	79·4	174	87	50·0
Junior	204	194	95·1	193	123	63·7
Departmental Kindergarten Examination	48	36	75·0	28	18	64·3
Bombay European Schools Teachers' Diploma Examination	24	11	45·8	11	5	45·5

13(6). Four Senior scholarships of the value of Rs. 30 per mensem and nine Junior scholarships of the value of Rs. 12 per mensem are awarded annually to Anglo-Indian and European pupils on the results of the Cambridge Local examinations. The Senior scholarships are tenable for four years either in a college affiliated to Bombay University or in an approved Technical, Commercial or Professional institution. The Junior scholarships are tenable for two years in a European High school or in a recognised Technical or Professional institution. In 1941–42 four fresh Senior scholarships and nine Junior scholarships were awarded. The total expenditure on scholarships for the year amounted to Rs. 6,404.

Scholarships.

13(7). Eight institutions for boys and fourteen for girls had hostels attached to them. This number remained stationary but the number of boarders increased from 1,694 in 1937 to 1,798 in 1942. Conditions in these hostels are reported to generally satisfactory and provision for the medical examination and supervision of boarders exists in all hostels.

Hostels.

In 1941–42 boarding grants amounting to Rs. 1,18,300 were paid for orphans and destitute children attending European schools as against Rs. 99,967 in 1936–37.

General.

13(8). In spite of the conditions created by the War the quinquennium was one of steady progress and consolidation. The report submitted by the Inspector of European Schools shows that European schools are generally efficient. The increase of over 1,000 pupils in European schools was due partly to normal expansion and partly to the influx of pupils who came from abroad and of pupils who but for the war would have been in England.

Manual training, domestic science etc., find an important place in the curricula of some of the schools, while physical instruction and medical inspection receive special attention in all schools. Boys and girls are encouraged to take interest in games and sports and practically every school has a Boy Scout Troop or a Girl Guide Company.

CHAPTER XIV.

Education of Muslims.

Number of pupils under instruction.

14(1). The total number of Muslim pupils under instruction in all kinds of educational institutions increased by 49,488, or 27 per cent., to 232,524, of whom 219,392 were in recognised institutions and 13,132 in unrecognised institutions.

The number of Muslim boys and girls in recognised institutions and their percentage to population is shown below :—

	Number of Muslim pupils in recognised institutions.		Percentage of Muslim pupils to total pupils.	Percentage of Muslim pupils to Muslim population.	Percentage of Muslim population to total population.
	1936–37.	1941–42.			
1	2	3	4	5	6
Boys	123,057	154,675	11·5	14·9	9·6
Girls	45,263	64,717	13·4	7·4	8·8
Total ..	168,320	219,392	12·0	11·4	9·2

The table below gives the number of Muslim pupils attending various kinds of recognised educational institutions in 1936–37 and 1941–42 :—

	Number of Muslim pupils in		Percentage increase.
	1936–37.	1941–42.	
1	2	3	4
Arts Colleges	488	700	43·4
Professional Colleges	172	285	65·7
Secondary schools	10,202	16,476	61·5
Primary schools	154,777	195,433	26·2
Special schools	2,681	6,498	142·4
Total (Recognised) ..	168,320	219,392	30·3

The number increased by 51,000 and it will be seen that there was a general increase in all types of institutions.

The following table compares the position of Muslims with that of other communities on the basis of the proportion of pupils under instruction to the total population :—

	Hindus.				Muslims	Others.	Average for all communities.
	Advanced.	Intermediate.	Backward.	Average for Hindus.			
1	2	3	4	5	6	7	8
1936–37 ..	22·0	5·8	3·9	6·7	11·6	14·4	7·5
1941–42 ..	27·7	7·5	5·3	8·2	12·1	16·7	8·9

Although the Muslims have considerable leeway to make up to come into line with the Advanced communities, they are definitely ahead of the Intermediate and the Backward classes. They have also a higher percentage of pupils under instruction than the average for total Hindus or the average for all communities together.

Expenditure.

14(2). It is not possible to give a definite estimate of the expenditure on Muslim education as 28·4 per cent. of the Muslim pupils attend ordinary schools. The expenditure in 1941–42 may, however, be roughly estimated at Rs. 58,29,000, of which Rs. 24,67,000 was met from Government funds.

Higher Education.

14(3). The number of Muslim students in Arts and Science colleges increased from 488 to 700 and in Professional colleges from 172 to 285. As an encouragement to Muslim students to take to higher education there are special scholarships in Arts and Professional colleges and reserved places in Government Professional colleges. There are also various endowment funds for scholarships to Muslim students. The gradual increase of Muslims passing the B.T. degree examination during the quinquennium is an encouraging feature. Sixteen Muslims passed the examination in 1941–42.

Secondary Education.

14(4). The number of Muslim pupils attending Secondary schools rose by 6,274, or 61·5 per cent., to 16,476, as against 21·9 per cent. five years ago.

The number of Secondary schools and classes teaching through the medium of Urdu increased from 36 to 66 and these were attended by 6,049, or 36·7 per cent., of the total number of Muslim pupils under instruction.

Government maintain Anglo-Urdu High Schools for boys at Nasik, Poona, Sholapur and Hubli, and an Anglo-Urdu High School for girls at Poona. Hostels are attached to the Anglo-Urdu High Schools at Poona and Hubli, while separate hostel arrangements have been made for Muslim pupils in some of the Government and non-Government Secondary schools. Special facilities in the form of reserved accommodation, free studentships and special scholarships in ordinary Government Secondary schools are also offered to Muslim pupils.

Provision for the teaching of Persian exists in all Government High schools, while Arabic is taught in the Government High schools at Nasik, Jalgaon, and Poona.

Primary Education.

14(5). The total number of Muslim pupils in Primary schools increased by 40,656, or 26·2 per cent., to 195,433, of whom 146,883,or 75·2 per cent., were in schools specially intended for Muslims and 48,550, or 24·8 per cent., were attending ordinary Primary schools. Nearly 50 per cent. of the increase was in aided schools.

Curriculum.

14(6). In Urdu Primary schools two alternative forms of curricula have been prescribed, (*1*) the Urdu-Primary in which Urdu is used as the medium of instruction and the regional language is taught as an additional optional subject and (2) the Primary-Urdu in which instruction is given through the regional language with Urdu as a compulsory second language. The course to be followed is left to the option of the local members of the Muslim community.

The figures submitted by the Educational Inspectors shew that while the number of schools taking the Primary-Urdu course increased by only 2 to 62, there has been an increase of 131 in the number of schools taking the Urdu-Primary course.

Urdu schools for girls follow a separate curriculum in which instruction in all subjects is imparted through the medium of Urdu.

The following table compares the number of Muslim pupils who passed the Primary School Certificate Examination in regional languages and in Urdu in 1936–37 and 1941–42 :—

	1936–37.	1941–42.
Number of pupils who passed the Primary School Certificate Examination in the regional languages ..	299	639
Number of pupils who passed the Primary School Certificate Examination in Urdu	554	1,035

Primary teachers.

14(7). The following table compares the number of Muslim teachers in Government, District Local Board and Municipal Primary schools in 1936–37 and 1941–42 with their qualifications :—

	1936–37.		1941–42.	
	Number.	Percentage.	Number.	Percentage.
1	2	3	4	5
(*a*) Trained	2,079	53·7	2,329	54·3
Qualified	1,517	39·2	1,770	41·2
Unqualified	273	7·1	193	4·5
(*b*) Total untrained ..	1,790	46·3	1,963	45·7
Total number of Muslim teachers (*a*) and (*b*) ..	3,869	100	4,292	100

It will be seen that although the percentage of trained and qualified teachers has shown a small increase during the quinquennium, the percentage of untrained teachers is still high. In view, howerver, of the policy of Government to train all Primary teachers in the employ of Local Authorities within certain age limits, the percentage of trained Muslim teachers is expected to rise in course of time.

Education of Muslim Girls.

14(8). The number of Muslim girls under instruction in recognised institutions increased by 19,454, or 43·0 per cent. to 64,717 as shewn below :—

	1936–37.	1941–42.
Colleges	28	71
Secondary schools	711	1,956
Primary schools..	44,411	61,702
Special schools	113	988
Total ..	45,263	64,717

The increase was shared by all kinds of institutions, but the dearth of qualified women teachers and the Purdah system still retard the progress of Muslim girls' education.

Institutions specially intended for Muslims.

14(9). The number of educational institutions specially intended for Muslims rose during the quinquennium by 719 to 2,209, of which 1,764, with 122,304 pupils, were for boys, and 445, with 34,866 pupils, were for girls. This number includes 63 Maktabs, with 5,053 children. The Maktabs attempt to impart elementary instruction in addition to the reading of the Koran.

CHAPTER XV

Education of the Intermediate and Backward Classes.

Introduction.

15(1). The Intermediate classes include the Marathas, the cultivating and artisan classes, and the Lingayats, while the Backward classes comprise those Hindu communities which are called the Scheduled classes, the Aboriginal and Hill Tribes and other Backward classes.

15(2). The Intermediate classes form 56·8 per cent. and the Backward classes 22·2 per cent. of the total population of the Province according to the Census of 1941. The percentage of pupils to the total number of pupils under instruction in the case of the Intermediate classes is 48·2, and in the case of the Backward classes 13·4. The corresponding figures five years ago for these two classes were 45·7 and 11·0. Seven and a half per cent. of the population is under instruction in the case of the Intermediate classes and 5·3 per cent. in the case of the Backward classes. The corresponding figures five years ago for these two classes were 5·8 and 3·9.

The following table gives the number of pupils belonging to the Intermediate and Backward classes under instruction in the various kinds of recognised educational institutions during the years 1936-37 and 1941-42:—

	Intermediate classes.				Backward classes.			
			Increase.				Increase.	
	1936-37	1941-42	Number	Percentage.	1936-37	1941-42	Number	Percentage.
Colleges ...	1,262	2,449	1,187	94·1	142	336	194	136·6
Secondary schools ...	25,945	40,786	15,441	60·9	2,621	4,863	2,242	85·5
Primary schools ...	572,609	818,336	245,727	42·9	140,134	231,322	91,188	65·1
Training schools ...	550	1,336	786	142·9	130	315	185	142·3
Other Special schools ...	4,741	19,840	15,099	303·6	1,057	8,942	7,285	439·6
Total ...	604,507	882,747	278,240	46·0	144,084	245,778	101,094	69·9

The percentage increase in the total number of pupils was 46·0 for the Intermediate classes and 69·9 for the Backward classes, as against 15·7 for the Intermediate classes and 9·2 for the Backward classes during the previous quinquennium. The statement shews that there has been an all round increase in the number of pupils belonging to these classes in all kinds of educational institutions.

Intermediate Classes (Hindus).

15(3). The following table compares the number of pupils under instruction in recognised institutions belonging to the main sub-sections of the Intermediate Hindus :—

1	Number of pupils in 1936–37. 2	Number of pupils in 1941–42. 3	Percentage of increase. 4
Marathas	193,659	308,570	59·3
Kunbis, Kolis and other cultivating classes	221,903	312,459	40·8
Artisans, etc.	104,381	139,294	33·5
Lingayats	84,564	122,424	44·8
Total ..	604,507	882,747	46·0

There has been a marked increase in the number of pupils all round, the percentage increase being the largest in the case of the Marathas.

Special facilities.

15(4). For the education of the Intermediate classes special facilities have been provided by Government. Special scholarships have been reserved in various kinds of educational institutions and free-studentships in Government Secondary schools to the extent of 22½ per cent. of the total number of pupils of these classes. The children of the Konkani Marathas in the Kanara, Kolaba and Ratnagiri districts are admitted free in all schools. The loss entailed in granting such exemption is made good by a special fee grant to the schools attended by such pupils. Thirty per cent. of the places in Government Secondary schools are reserved for the Intermediate classes.

In almost all the important towns in the Central Division private boarding houses are run by different communities. These boarding houses are taken advantage of largely by pupils of the Intermediate classes tudying in Secondary schools.

In the Northern Division, one special agricultural bias school, with a boarding house attached to it, is maintained at Ambali in the Godhra taluka of the Panch Mahals District for the pupils of the Dharala community.

In the Southern Division the Lingayats form the bulk of the Intermediate classes. The community maintains Arts and Professional colleges and Secondary schools in the Division. Scholarships are also awarded to Lingayat students in colleges and Secondary schools from special funds raised by the community.

The teachers of the Intermediate classes employed in Government, District Local Board and Municipal Primary schools increased during the quinquennium from 9,761 to 11,767 and formed 35·3 per cent. of the total number of Primary teachers.

Backward Classes (Hindus).

15(5). The following table shows the number of pupils of each of the three main sections of the Backward classes under instruction during the years 1936–37 and 1941–42 :—

	Scheduled classes.		Aboriginal and Hill Tribes.		Other Backward classes.		Total.	
	1936–37	1941–42	1936–37	1941–42	1936–37	1941–42	1936–37	1941–42
Colleges	58	187	1	9	83	140	142	336
Secondary schools ...	1,801	2,780	86	333	734	1,750	2,621	4,863
Primary schools ...	77,717	103,495	28,668	60,135	33,749	67,692	140,134	231,322
Training institutions ...	87	189	10	43	33	83	130	315
Other Special schools ...	823	3,726	340	1,765	404	3,451	1,567	8,942
Total ...	80,486	110,377	29,105	62,285	35,093	73,116	144,684	245,778

There has been an all round increase in the number of pupils of each of the three main sections of the Backward classes in all kinds of educational institutions, the total number of pupils having increased during the quinquennium from 144,684 to 245,778. There has been a good deal of general awakening among the Backward classes for education, and special efforts are being made to give them adequate facilities.

Special facilities.

15(6). As in the case of the Intermediate classes, special facilities have been provided by Government for the Backward classes also. These facilities include (*a*) exemption from the payment of fees in Primary schools and Government Secondary schools, (*b*) special Government scholarships in Primary and Secondary schools and Arts and Professional Colleges, (*c*) exemption from the payment of examination fees at the High and Middle School Scholarship examinations, and (*d*) concession fee rates for the Primary School Certificate examinations for Boys and Girls. In addition to these facilities, the Backward Class Department gives financial help in the form of lump scholarships to poor and deserving pupils.

Twenty per cent. of the places are reserved for the Backward classes in Government Secondary schools, and 25 per cent. of seats are reserved in the College of Engineering, Poona, and 10 per cent. in other Government Professional colleges for the Intermediate and Backward classes. In the matter of admissions to Training institutions, an adequate number of teachers from the Backward classes (including the Scheduled classes) is admitted for training.

Some of the District Local Boards also award scholarships to deserving pupils attending Primary schools and make a free distribution of clothes, books, slates and writing material.

A special Backward Class Hostel is maintained by Government in Poona under the control of the Backward Class Officer. It had 63 boarders on 31st March 1942. This hostel is meant for all Backward class pupils including the Scheduled classes. In addition, there are 62 hostels maintained by private bodies for the Backward classes and which receive a grant-in-aid from the Backward Class Officer. Backward class pupils are also admitted to some of the hostels maintained for other communities.

The Backward Class Officer appointed by Government looks after the promotion the of social and educational welfare of the Backward classes, and keeps in close touch with the officers of this Department as well as the officers of School Boards in regard to questions pertaining to the difficulties experienced by these classes.

There is also a Backward Class Board the functions of which are consultative and advisory.

Scheduled Classes.

15(7). The number of pupils of the Scheduled classes in the Province increased from 80,486 in 1936-37 to 110,377 in 1941-42. These were distributed by Divisions as under :—

	1936-37.	1941-42.
Bombay Division	22,695	31,309
Central Division	35,735	46,505
Northern Division	13,324	17,385
Southern Division	8,727	15,176
European and Secondary (English) Schools	5	2
Total ..	80,486	110,377

Of the 110,377 pupils, as many as 103,495 were in Primary schools, but there was a general increase in all institutions. Every effort is made by Local Authorities and the officers of the Department to see that no disabilities of any kind are imposed upon the pupils of these classes. They are now admitted freely without any restriction into schools. If any objection is raised in regard to their admission to a temple school, steps are taken by the Local Authorities to shift the school to some other village, if no other building is made available for the school in the village.

The number of separate Primary schools intended for the Scheduled classes is gradually decreasing. No separate schools for these communities are to be maintained, except in very special circumstances.

The number of teachers of the Scheduled classes employed in Government, District Local Board, and Municipal Primary schools increased from 1,017 in 1936-37 to 1,643 in 1941-42. Scheduled class teachers are now appointed to ordinary Primary schools and no discrimination is made against such teachers in these schools.

In the Bombay Division, the District Local Board, Thana, maintains a special Boarding House for the children of the Scheduled classes at Shahapur with 25 boarders

Aboriginal and Hill Tribes.

15(8). The Aboriginal and Hill Tribes mostly consist of Mahadeo Kolis, Thakurs, Katkaris and Bhils inhabiting the slopes of the Sahyadris. These tribes are scattered over large areas and lead a nomadic life. It is difficult to get the children to attend school without providing the requisite lodging and boarding facilities at central places. A number of Central schools with hostels attached to them are maintained for the benefit of the children of these tribes by the District Local Boards, of Thana, Kolaba, Nasik, Poona, Ahmednagar, West Khandesh, Panch Mahals, Broach and Surat. The Bhil Seva Mandals started in the West Khandesh and Panch Mahals Districts are also doing valuable work for the education of these tribes.

The total number of pupils belonging to the Aboriginal and Hill Tribes attending all kinds of recognised institutions increased from 29,105 in 1936–37 to 62,285 in 1941–42. These were distributed by Divisions as under :—

	1936–37.	1941–42.
Bombay Division	6,762	12,795
Central Division	9,474	23,622
Northern Division	11,422	20,778
Southern Division	1,447	5,090
Total ..	29,105	62,285

Of the 62,285 pupils, as many as 60,135 were in Primary schools. There was a general increase also in all kinds of educational institutions.

The number of Primary schools specially intended for the pupils of these tribes increased from 206 in 1936–37 to 594 in 1941–42 and the pupils from 6,856 to 18,548. The number of teachers of these tribes employed in Government, District Local Board, and Municipal Primary schools also increased from 333 in 1936–37 to 464 in 1941–42.

Other Backward Classes.

15(9). All Backward classes other than the Scheduled classes and the Aboriginal and Hill Tribes come under this head. The number of pupils of these classes attending all kinds of recognised institutions increased from 35,093 in 1936–37 to 73,116, in 1941–42. Of the 73,116 pupils, 67,692 are in Primary schools. There was also an increase in the number of pupils in all other educational institutions.

15(10). Several settlements and free colonies have been established by Government for the Criminal Tribes, where day and night schools are maintained for the benefit of the children of these Tribes. These settlements are under the control of the Backward Class Department.

Settlement schools.

Education in the settlements for children between the ages of 5 and 13 is compulsory.

The following table compares the figures of the total population in the settlements and free-colonies and the number of children attending day and night schools :—

	Figures on 31st March 1937.	Figures on 31st March, 1942.
Total population in the settlements	8,231	5,388
Total population in the free-colonies	7,212	8,943
Children attending schools in the settlements ..	1,924	1,006
Children attending day schools in the free-colonies ..	1,336	1,507
Children attending night schools in the settlements ..	228	171
Children attending night schools in the free-colonies ..	210	292

Besides, 361 children from the settlements and free-colonies attend ordinary Primary schools and 27 children attend Secondary schools. The corresponding figures during the year 1936–37 were 344 and 15.

Boys in some settlements and free-colonies are given instruction in carpentry, drawing, weaving, paper-cutting, etc. and girls in sewing, needle-work and spinning. During the quinquennium ending 31st March 1942, the number of Criminal Tribes boys passing the various technical examinations was :—

Carpentry and drawing	47
Weaving	13
Mechanical fitter	1

The number of children apprenticed to various trades such as carpentry, masonry, tailoring, weaving, spinning and sisalfibre, etc., was 183 in 1941–42, as against 83 in the year 1936–37.

To promote literacy among the adults, adult education classes are being held and special Nursery classes (Bal Mandirs) have been opened in some settlements to look after children below 5 years of age when the mothers go out for work.

The Backward Class Officer reports that school work in general has been satisfactory in all the settlements and free-colonies.

CHAPTER XVI.

Physical Education.

General.

16(1). Physical training is compulsory for the first and second year classes of the Arts, Science and Commerce colleges affiliated to the Bombay University. Physical instruction now forms an intergral part of general education and arrangements for physical exercises and games are made in all Primary and Secondary schools. Lack of suitable playing fields is a handicap but the difficulty is being gradually overcome. Of the 869 Secondary schools, 657 have playing fields and 650 are equipped with physical apparatus. The position of Primary schools in this respect is also gradually improving. Of the 14,055 Primary schools maintained or aided by District Local Boards and Municipalities, 3,752 have play-grounds and 7,525 have special physical apparatus.

Eight posts of Assistant Deputy Educational Inspectors for physical education were created during the quinquennium, and short-term courses in physical instruction were held by these officers at various centres for the benefit of Primary teachers.

The expenditure incurred by Government in 1941–42 on various objects connected with physical education amounted to Rs. 1,67,000.

Training Institute for Physical Education, Kandivli.

16(2). The Training Institute for Physical Education, Kandivli, which was opened in November, 1938, serves as a training centre for graduate teachers in Government and non-Government Secondary schools. The course extends over a period of 9 months and consists of theoretical and practical training. Since its start the institute has trained about 230 teachers who are now working in the various Secondary schools in the Province.

About 200 undergraduate teachers are also trained every year in short-term courses held at the Institute.

Gymnasia.

16(3). Gymnasia which are not attached to particular institutions are recognised by the Department and aided under certain conditions. At the end of the quinquennium there were 113 recognised gymnasia with an enrolment of 13,290. Grants amounting to Rs. 9,890 were paid to gymnasia in 1941–42.

Board of Physical Education.

16(4). The Board of Physical Education established in 1938 continues to advise Government on various matters connected with physical education. The Board was reconstituted in 1940.

The University Training Corps.

16(5). An increase of 50 per cent. in the strength of the 1st (Bombay) Battalion was sanctioned by the Army Headquarters with effect from October, 1940, and consequently six more platoons were added to the Battalion which had a total strength of 34 officers and 955 other ranks at the end of the quinquennium.

16(6). In July, 1938, a section of the Boy Scouts Association seceded from the Association and reconstituted itself as the Hindustan Scout Association.

Boy Scouts.

Schools are at liberty to affiliate their Scout troops to either of the Associations and the expenditure incurred by them on scouting is admitted for a special grant for physical education. On 31st March, 1942, the total strength of the Boy Scouts (Baden-Powell) Association, was 13,390, as against 12,200 in the preceding year, while the number of boy scouts of the Hindustan Scout Association decreased by 6,047 to 37,917.

In 1941–42 a grant of Rs. 21,000 was paid to the two organizations.

16(7). The Bombay Girl Guides Association and the Girl Scout Section of the Hindustan Scout Association continued their activities during the quinquennium. On 31st March, 1942, the Associations had a total strength of 5,885 and 10,228. During the year 1941–42, a grant of Rs. 3,000 was paid to the Girl Guides Association and Rs. 1,000 to the other Girl Scout organization.

Girl Guides.

16(8). Students in affiliated colleges are examined medically every year. The total number of students medically examined in 1941–42 was 21,644 including 3,455 women.

Medical Inspection.

The medical inspection of pupils in Government Secondary schools is held by Government medical officers, while several non-Government schools make their own arrangements for medical inspection. Of the 663 Secondary schools (excluding English classes), 461 have introduced a proper system of medical inspection, and in 1941–42 of the 137,836 pupils in these schools, 117,821, or 86 per cent., were examined. Seven schools maintain a full-time medical officer. Of the children examined 60 per cent are normal, while 40 per cent have some physical defect or other. The following is the percentage of the main defects :—

Ear, nose, throat	30
Teeth	21
Eyes	19
Malnutrition	13
Other defects	17

In Primary schools under the control of the Local Authorities the aim is to have a child examined at least twice during the Lower Primary stage. Several Local Authorities have prepared schemes of general medical examination.

The Bombay Municipality has its own scheme for the medical examination of school children which includes arrangements for treatment with the consent of the parents.

Instruction in health and hygiene is imparted in all Primary and Secondary schools and Training institutions as a part of the school curriculum.

CHAPTER XVII.

THE BORSTAL SCHOOL, DHARWAR, AND SCHOOLS CERTIFIED UNDER THE BOMBAY CHILDREN ACT, 1924.

Introduction.

17(1). The Bombay Borstal Schools Act, 1929, deals with young offenders over 16 years of age and persons committed under this Act are detained in the Borstal School, Dharwar. This institution has been classified as a Reformatory School. A full account of the Institution will be found in the "Annual Administration Report on the Borstal School, Dharwar," published by the Inspector General of Prisons.

Provision for the custody, protection and treatment of destitute and delinquent children—16 years of age and under—is made under the Bombay Children Act, 1924. Children dealt with under this Act are committed either to Certified schools or entrusted to the care of relatives or other fit persons. The Backward Class Officer is the Chief Inspector of Certified Schools, while the Educational Inspectors inspect the educational work of these schools. The Juvenile Branch Administration Report published by the Backward Class Officer deals with the various aspects of certified schools, while this Chapter deals with the educational work of these schools.

There are three Major Certified schools in this Province attended by 1,065 pupils. These schools have been returned under "Other Schools" in the annual returns.

Number of Schools and Pupils.

17(2). The following table compares the enrolment and the average annual cost per pupil of the three Major Certified schools in this Province in 1936-37 and 1941-42:—

Name.	Management.	Number on rolls on 31st March.	Expenditure.		Annual cost per child.	
			Provincial.	Total.	Cost to Government.	Total cost.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	Rs.
1. Industrial School, Yeravda 1936-37	Government	227	37,497	41,344	171	189
1940-41		259	42,017	45,814	167	182
1941-42		264	48,182	52,711	186	204
2. David Sassoon Industrial School, Matunga, Bombay. 1936-37	Committee of Management	394	65,785	76,071	169	196
1940-41		364	63,603	75,040	172	203
1941-42		380	74,731	88,338	197	232
3. Children's Home, Chembur. 1936-37	Children's Aid Society.		Not in existence.			
1940-41		361	68,825	68,825	190	190
1941-42		421	71,865	71,865	180	180

The Willingdon Boys' Home maintained by the Salvation Army was closed in 1939 and the Children's Home, Chembur, was started by the Children's Aid Society.

One of the main objects of Certified schools is to equip their pupils with a reasonable literary and vocational or industrial education to enable them to earn an honest living after discharge from the school. All the Certified schools provide instruction up to Primary standard IV or V and the David Sassoon and Yeravda Industrial Schools also teach English. Details of the various industries taught in Certified schools are given in the Juvenile Branch Administration Report.

In addition to the three Major Certified schools mentioned above, there are 16 "Homes" certified under the Bombay Children Act as fit places for the custody and protection of homeless children and children committed by Juvenile Courts. There were 1,308 children in these Homes on 31st March, 1942. These children attend Primary or Secondary schools, and in addition in many of the homes arrangements have been made to provide instruction in certain useful arts or crafts calculated to help them eventually to be self-supporting. Some of these children are also apprenticed to Mills or Workshops.

CHAPTER XVIII.

Education of Defectives.

The term "defectives" used in this Chapter is confined to the blind and the deaf-mutes for whose education provision is made in this Province.

Schools and pupils.

18(1). The existing provision for the education of defective children consists of 3 schools for the blind with 122 pupils and 9 schools for deaf-mutes with 276 pupils. The following table compares the enrolment and the cost per pupil in these schools in 1936–37 and 1941–42 :—

	Number of schools.	Number of pupils.	Expenditure.		Average annual cost per pupil.	
			Provincial.	Total.	Cost to Government.	Total cost.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	Rs.
Schools for the Blind. 1936–37 ..	2	109	4,449	19,358	40	176
Schools for the Blind. 1941–42 ..	3	122	6,089	23,532	47	184
Schools for Deaf-mutes. 1936–37 ..	5	183	8,320	28,245	49	165
Schools for Deaf-mutes. 1941–42 ..	9	276	10,090	33,928	36	121
Total .. 1936–37 ..	7	292	12,769	47,603	45	170
Total .. 1941–42 ..	12	398	16,179	57,460	40	141

All these schools are maintained by private bodies and receive grants from Government or the local bodies. The majority of these schools provide board and lodging for their pupils.

School-work.

18(2). The blind receive instruction in the 3 R's in the regional languages by means of a Braille Code. English is also taught to some of the pupils. In addition to elementary education, various useful crafts are taught to enable the pupils eventually to earn a living. Provision for vocal and instrumental Music is also made in schools for the blind.

Lip-reading and articulation form the main features of instruction in schools for deaf-mutes. Practical training is also given in at least one of the common industries.

Arrangements for the medical inspection of pupils are made in all schools for defectives. Physical drill and games suited to local conditions are encouraged and every possible effort is made to keep the children happy and cheerful. A record of past students is maintained and efforts are made to secure suitable employment for them.

General.

18(3). During the Quinquennium Sir Clutha Mackenzie of St. Dunstan's visited the schools for the blind in Bombay and made certain valuable suggestions for the improvement of these schools. An experienced person from outside the Province is invited to inspect the schools for deaf-mutes.

CHAPTER XIX.

Adult Education.

Introduction.

19(1). Till the end of the previous quinquennium, adult education was confined to night schools maintained by local bodies or industrial workers and these were attended mostly by grown up lads who could not attend day schools. In 1937, for the spread of adult literacy, 30 adult literacy classes were opened and in the following year the programme of adult education was placed on a definite footing and a Provincial Board for Adult Education consisting of non-officials appointed to advise Government on adult education.

Literacy classes for Adults.

19(2). A scheme of registration of adult education workers and of grants-in-aid of adult education classes conducted by registered workers, bodies or associations was put into operation from January, 1939, and liberal scales of grants-in-aid to these classes were sanctioned. These measures gave a definite impetus to the growth of such classes and in 1939–40 the number rose from 432 to 2300 with an enrolment of about 58,000 adults, of whom 13,000 were made literate at an average cost of Rs. 4½ per adult. This cost seemed high : so the rates of grants-in-aid were reduced and by the end of March, 1940, over 50 per cent. of the classes were closed. In the following year the old rates of grants were restored and this step helped to prevent a further drop in the number of these classes. Thus at the end of the quinquennium there were 995 literacy classes with an enrolment of 25,057 adults in the Province. The total cost to Government on account of these classes in 1941–42 amounted to Rs. 89,736.

A campaign to eliminate adult illiteracy was started in Bombay City in 1939 by the Bombay Literacy Campaign Committee, a body of leading citizens and social workers. This Committee was subsequently replaced by the Adult Education Committee appointed by Government. A Special Literacy Officer was also appointed to organize the campaign on a wider scale and Literacy classes were started at various centres in the City. The classes maintained by the Committee or organized under its direction are held in three or four sessions during the year. On 31st March, 1942, there were 297 classes in Bombay City with an enrolment of 6,127. During the past three years over 40,000 adults, including 7,300 women, were made literate.

The total expenditure of the Committee in 1941–42 amounted to Rs. 58,000, of which Rs. 51,000 was contributed by Government.

Reading Rooms.

19(3). In order to prevent the literate adult from relapsing into illiteracy a scheme for the e tablishment of village libraries and reading rooms was sanctioned by Government in 1941. This scheme provides for the registration of libraries and reading rooms for adults and for the payment of a grant-in-aid for their maintenance. In 1941–42, 762 village libraries were

started and grants amounting to Rs. 22,000 were paid. Efforts are being made for the publication of suitable literature for adults.

In 1941 a scheme for the training of adult workers was introduced and training classes were held in different Divisions. Some 200 workers took advantage of these classes.

Schools and pupils.

19(4). The total number of schools for adults of all kinds increased from 180 to 1,100 and the number of adults in them from 6,299 to 28,471. Of the 1,100 schools for adults, 3 with 113 adults were advanced Night schools, 6 with 246 adults were special schools, and 96 with 3,055 adults were Primary Night schools. The remaining 995 institutions were literacy classes and these were attended by 25,057 adults. The following table shows the number of Primary schools and literacy classes for adults in each Division on 31st March, 1937 and 1942:—

	Number of schools.				Number of pupils.			
	1937.		1942.		1937.		1942.	
	Men.	Women.	Men.	Women.	Men.	Women.	Men.	Women.
Bombay Division.	32	..	278	85	1,576	..	6,359	1,427
Central Division .	67	2	234	11	1,880	244	6,631	625
Northern Division.	38	..	218	4	1,144	..	5,841	116
Southern Division.	27	..	249	12	636	..	6,521	592
Total ..	164	2	979	112	5,236	244	25,352	2,760

The marked increase in the numbers was due to the opening of special literacy classes for adults. Of the special classes for women, particular mention may be made of those conducted by the Seva Sadan, Bombay, the Bombay Education League, the Naigaon Social Service Centre, the J. B. Vachha High School, Dadar, the Seva Sadan, Poona, the Hindu Stree Mandal, Broach, the Mahila Vidyalaya, Surat, and the Jyoti Sangh, Ahmedabad.

Expenditure.

19(5). The total expenditure on schools for adults increased by Rs. 1,67,482 to Rs. 2,89,849, of which Rs. 92,751, or 32 per cent.. was met from Government funds, Rs. 1,65,672, or 57·2 per cent., from Board funds, Rs. 3,737, or 1·3 per cent., from fees, and Rs. 27,689, or 9·5 per cent., from other sources.

Extension work.

19(6). To extend facilities for the further education of the literate adult, the Bombay Adult Education Committee maintained about 100 post-literate classes.

Many of those who seek employment after completing the Primary or Secondary courses are in need of facilities for further education to enable them to take a business career or to better their prospects in commercial or other business firms. The Bombay Presidency Adult Education Association is doing valuable work in providing such fac lities. In addition to post-literacy classes, the Association conducts various extension courses including a two-year course in economics and political theory. In 1942, special classes in Radio servicing, photographic processes and pictorial photography, were also held.

The Village Improvement Committees and the Deputy Educational Inspector for Vi ual Instruction arranged for a number of Magic lantern lectures for the spread of useful knowledge on subjects of social interest and on various matters connected with village sanitation, health and hygiene.

CHAPTER XX.

Unrecognised Institutions.

20(1). The remarks in this Chapter are confined to unrecognised institutions which are not under the control of the Department. The ephemeral character of these schools and the reluctance of the managers to submit statistical returns renders comparison difficult. The reports submitted by the Educational Inspectors shew that the number of unrecognised schools gradually fell during the Quinquennium. The following table compares the statistics of these schools :—

	Institutions.		Pupils.	
	1937.	1942.	1937.	1942.
Colleges	3	3	155	230
Secondary Schools ..	125	59	11,148	5,701
Primary and Special Schools ..	542	301	25,017	16,661
Total ..	670	363	36,320	22,592

Unrecognised Primary schools are mostly indigenous schools which cater for small villages in which the Local Authorities are unable to open their own schools. The decrease in the number of Primary schools is reported to be due mainly to the recognition of such unrecognised schools under the scheme of approved Primary schools during the Quinquennium. Unrecognised special schools are mostly Maktabs and Pathashalas imparting instruction in Persian, Arabic and Sanskrit along traditional lines and a few Ayurvedic schools.

With the exception of the schools affiliated to the Indian Women's University, unrecognised Secondary schools are tutorial classes run by unemployed teachers. The University Statute requiring candidates for the Matriculation examination to put in a specified attendance has not only prompted a number of unrecognised Secondary schools to seek Departmental recognition but has also prevented to some extent, the growth of mushroom schools which had sprung up in recent years.

The three colleges are those in Bombay, Poona and Ahmedabad affiliated to the Indian Women's University and which follow a course leading to the G. A. degree of that University.

Poona,
21st April, 1943.

S. MOOS,

Explanatory Notes:—

(1) Figures for *urban* areas (i.e. municipal, cantonment, notified and small town committee areas) are excluded from this table.

(2) The expenditure on institutions includes expenditure on buildings and miscellaneous charges incurred on the schools.

(3) The total number of pupils from rural areas, who are under instruction, is shown in column 10 of Tables IV-A and B and V-A and B.

(4) This table includes statistics relating to *training schools*, whether situated in urban or in rural areas, in which the majority of the students are being trained for employment in *rural* areas. It does not include the returns of training institutions located in rural areas, the majority of the students in which are trained for schools in *urban* areas.
